recursivity and how it is applied to their phenomenon of investigation Chapters in this book examine how recursive processes are related to and basic aspects of play and ritual imitation identity exploration managing stigma and commemorative practices This book is intended for psychologists sociologists and mathematicians Use of the book in post graduate and graduate level of university teaching is expected in seminar format teaching occasions Behavioral Sport Psychology James K. **Social Exclusion in the UK** Mel Hughes,2025-02-28

In UK society there are cultural norms and assumptions that affect many marginalised groups and this book aims to address and challenge these through the lens of the people who have lived these experiences

Social Exclusion in the UK presents a range of lived experiences alongside a critical commentary on the impact of social stigma exclusion and marginalisation on people s lives

This book s chapters are co authored by people with lived experience and academics and are all underpinned by the Transformative Learning Theory developed by scholar Mezirow

The marginalised experiences discussed in this book include different types of substance users care leavers asylum seekers offenders HIV positive those living in poverty or those who identify as transgender

What makes this book unique is that it gives a voice to those who have been the most affected by inequality whether it s economic or social and health inequalities

Those affected are the least likely to be involved in shaping and informing responses to it and this lack of involvement risks the further exclusion of those who are already marginalised

A few of the ways this book aims to challenge this include legitimising and prioritising lived experience expertise fostering critical reflection of our own beliefs and assumptions and drawing on lived experience expertise to inform responses and solutions
