## Module 6.1 Remembering

### Memory Processes: Human Memory as an Information Processing System

--Our memory can be conceptualized as an information processing system split into 3 categories:

1. **Encoding:** Converting information into a form usable in memory

- Relies on different sensory modalities, ie: auditory or visual.

- Sometimes people rely on meaning of incoming information, called **semantics**

- ie: might remember key terms better if you try to understand what it means rather than memorizing verbatim

2. **Storage:** Retaining information in memory

- How long something is kept depends on system being used

3. **Retrieval:** Bringing to mind information in memory

- Where you're accessing conscious information
- Some memories easier to recall than others, but might be dependent on **retrieval cues**, which are cues associated with original learning that may facilitate retrieval of these memories

### Sensory Memory

- Known as briefest storage system that hold memories of sensory impressions for short period of time ie: sights and sounds

- Memory here lasts from fraction of second to 3-4 seconds

- Considered to be first memory system where info passes through our system into memory storage system

**Iconic Memory:** where mental representations of an image is held for a fraction of a second

**Idetic Memory:** AKA photographic memory, where people can look at something quickly and recall this information

**The Historical Christ** Bruce W. Behrman, 2023-02-16 This book uses the recent findings of cognitive and clinical psychology to draw a picture of the historical Jesus The author uses recent research on conversational memory and clinical psychology in order to shine a light on the way Jesus was This book argues that Jesus suffered from manic depressive illness He identified with God He suffered from extreme mood changes and felt great compassion towards people All of these are mental states which may be triggered by manic depression Manic depression is not a dementing illness This author is not saying that Jesus suffered from a backward type of psychosis But manic depression when manifested in talented persons acts as a catalyst to trigger artistic creativity Many great artists and poets have suffered from manic depression Byron Schumann Tennyson van Gogh Fitzgerald and Lowell to name a few It is among great poets and artists such as these that the author places the historical Jesus This book therefore argues that the writers of the Gospels when they record Jesus as asserting his divinity were conveying an accurate picture of him His assertions of divinity were not fabrications of the early church
