Niglio,Eric Yong Joong Lee,2021-05-02 This book provides a substantial contribution to understanding the international legal framework for the protection and conservation of cultural heritage It offers a range of perspectives from well regarded contributors from different parts of the world on the impact of law in heritage conservation Through a holistic approach the authors bring the reader into dialogue around the intersection between the humanities and legal sciences demonstrating the reciprocity of interaction in programs and projects to enhance cultural heritage in the world This edited volume compiles a selection of interesting reflections on the role of cultural diplomacy to address intolerances that often govern international relations causing damage to human and cultural heritage The main purpose of this collection of essays is to analyse the different cultural paradigms that intervene in the management of heritage and to advocate for improvements in international laws and conventions to enable better cultural policies of individual nations for the protection of human rights The editors submit that it is only through open dialogue between the humanities and jurisprudence that the international community will be able to better protect and value sovereignty and promote cultural heritage for the development of a better world This collection is relevant to scholars working in areas relating to law management and policies of cultural heritage conservation and protection *Voices, Bodies, Practices* Catherine Laws,William Brooks,David Gorton,Nguyễn Thanh Thủy,Stefan

Östersjö,Jeremy J. Wells,2019-11-25 Identity and subjectivity in musical performances Who is the I that performs The arts of the twentieth and twenty first centuries have pushed us relentlessly to reconsider our notions of the self expression and communication to ask ourselves again and again who we think we are and how we can speak meaningfully to one another Although in other performing arts studies especially of theatre the performance of selfhood and identity continues to be a matter of lively debate in both practice and theory the question of how a sense of self is manifested through musical performance has been neglected The authors of *Voices Bodies Practices* are all musician researchers the book employs

artistic research to explore how embodied performing voices can emerge from the interactions of individual performers and composers musical materials instruments mediating technologies and performance contexts **The Routledge**

One of the great mysteries of music is how it affects us in multitude of ways Whether talking about our individual tastes as listeners or individual differences as performers what are the psychological qualities that can turn some people into great musicians but not others Is it down to genes sheer hard work or some other quality in the individual The Natural Musician is the story of how we become composers performers or just discriminating listeners It searches for those psychological traits essential for turning one into a musician Unlike many others Kirnarskaya does believe in the existence of talent but argues that it is due to multiplicative factors which she describes analyses and shows how to test She also sheds light on the essence and origins of perfect pitch examines the triumphs and tortures of musical prodigies and considers the implications of her theories for the teaching of music After a foreword from the legendary conductor Gennady Rodhestvensky the book looks at our basic musical faculties how we perceive sounds distinguish their pitch and structure and recognise rhythm It then examines the nature of musical empathy what it is that allows us to perceive and emotionally connect with music The second part of the book focuses on the creative processes behind writing music The third section deals with music education looking at the role of innate and inherited characteristics in the formation of talent and considering why many who excel at an early age burn out later on The book ends exploring how musical development can shape the human brain strengthening other cognitive faculties including those unrelated to music This is a book that will fascinate anyone with an interest in music and musicians from the fields of music psychology and education to musicians themselves whether amateur and professional

The Teaching of Instrumental Music Richard Colwell,Michael Hewitt,2015-08-20 This book introduces music education majors to basic instrumental pedagogy for the instruments and ensembles most commonly found in the elementary and secondary curricula This text focuses on the core competencies required for teacher certification in instrumental music The first section of the book focuses on essential issues for a successful instrumental program objectives assessment and evaluation motivation administrative tasks and recruiting and scheduling including block scheduling The second section devotes a chapter to each wind instrument plus percussion and strings and includes troubleshooting checklists for each instrument The third section focuses on rehearsal techniques from the first day through high school *Musicians in the Making* John Scott Rink,Helena Gaunt,Aaron Williamon,2017 Musicians are continually in the making tapping into their own creative resources while deriving inspiration from teachers friends family members and listeners Amateur and professional

performers alike tend not to follow fixed routes in developing a creative voice instead their artistic journeys are personal often without foreseeable goals The imperative to assess and reassess one's musical knowledge understanding and aspirations is nevertheless a central feature of life as a performer Musicians in the Making explores the creative development of musicians in both formal and informal learning contexts It promotes a novel view of creativity emphasizing its location within creative processes rather than understanding it as an innate quality It argues that such processes may be learned and refined and furthermore that collaboration and interaction within group contexts carry significant potential to inform and catalyze creative experiences and outcomes The book also traces and models the ways in which creative processes evolve over time Performers music teachers and researchers will find the rich body of material assembled here engaging and enlightening The book's three parts focus in turn on Creative learning in context Creative processes and Creative dialogue and reflection In addition to sixteen extended chapters written by leading experts in the field the volume includes ten Insights by internationally prominent performers performance teachers and others Practical aids include abstracts and lists of keywords at the start of each chapter which provide useful overviews and guidance on content Topics addressed by individual authors include intrapersonal and interpersonal dynamics performance experience practice and rehearsal self regulated performing improvisation self reflection expression interactions between performers and audiences assessment and the role of academic study in performers development

**Music and the Mind** Irène Deliège, Jane Davidson, John A. Sloboda, 2011-02-17 Music and the Mind brings together an outstanding international team of authorities from the fields of music and psychology to celebrate the life and work of John Sloboda In addition the book reviews and takes stock of where the field of music psychology stands 25 years after Sloboda's classic work The Musical Mind first appeared

Musical Imaginations David Hargreaves, Dorothy Miell, Raymond MacDonald, 2012 Musical imagination and creativity are amongst the most abstract and complex aspects of musical behaviour though until recently they have been difficult to subject to empirical enquiry However music psychology and some allied disciplines have now developed both theoretically and methodologically to the point where some of these topics are now firmly within our grasp The study of creativity and imagination is growing rapidly in disciplines including psychology sociology neuroscience and education The inter and multidisciplinary study of music and developments in music psychology in particular mean that studies of musical imagination and creativity in action are now distinctly possible Musical Imaginations is a wide ranging multidisciplinary review of the latest theory and research on musical creativity performance and perception by some of the most eminent scholars in their respective disciplines The topics addressed in this book include the investigation of creativity and imagination in music and emotion composition and improvisation performance and performance traditions listening strategies different musical genres and cultural belief systems social collaboration identity formation and the development of psychologically based strategies and interventions for the enhancement of performing musicians With creativity now a topic of significant interest this book will be valuable to all

those in the fields of psychology sociology neuroscience education as well as to musicians themselves dealing with practical as well as theoretical issues in music therapy performance and education The study of creativity and imagination is growing rapidly in disciplines including psychology sociology neuroscience and education The inter and multidisciplinary study of music and developments in music psychology in particular mean that studies of musical imagination and creativity in action are now distinctly possible This book undertakes a multidisciplinary review of these developments It contains a wide range of contributions by some of the most eminent scholars in their respective disciplines representing a comprehensive account of the state of the art of theory and research on musical creativity performance and perception
