 to reimagine how we might better live our daily lives In the 6th century BCE the Greek philosopher Pythagoras a man  
 remembered today more for his theorem about right angled triangles than for his progressive politics founded a commune in  
 a seaside village in what s now southern Italy The men and women there shared their property lived as equals and dedicated  
 themselves to the study of mathematics and the mysteries of the universe Ever since humans have been dreaming up better  
 ways to organize how we live together pool our resources raise our children and determine who s part of our families Some  
 of these experiments burned brightly for only a brief while but others carry on today from the Danish cohousing communities  
 that share chores and deepen neighborly bonds to matriarchal Colombian ecovillages where residents grow their own food  
 and from Connecticut where new laws make it easier for extra alloplicants to help raise children not their own to China  
 where planned microdistricts ensure everything a busy household might need is nearby One of those startlingly rare books
