Writing Measurable Outcomes in Psychotherapy Sharon Kopyc, 2020 The text *Writing Measurable Outcomes in*

Psychotherapy may be of interest to anyone who is interested in how therapists help clients with their problems. The author has created a model taken from cognitive psychology to simplify how to tackle problems and provides a quick method to identify where one is situated in thinking about their problem. The model is based on Bloom's Taxonomy, an educational theory used by teachers to evaluate student learning: remember, understand, apply, analyze, evaluate, and create. Also discussed are key elements of psychotherapy: the importance of a strong relationship, assuring that clients remain as experts in their life and that they give feedback about the therapy.

Sexual Dysfunction in Women Marta Meana, 2012-01-01. Sexual Dysfunction in Women is a concise yet detailed clinical guide to the treatment of sexual difficulties in women. Written with the general psychologist and therapist in mind and being published with a companion volume on Sexual Dysfunction in Men, it takes the novel position that most clinicians interested and willing to help female clients with sexual concerns can do so effectively even if they do not primarily consider themselves as sex therapists. Many women will experience difficulties with desire, arousal, orgasm, or pain with intercourse at some point in the course of their lives, yet most clinicians feel less equipped to treat sexual dysfunction than far less prevalent disorders. This book empowers general psychologists, therapists, and other practitioners to actively engage in the multidisciplinary treatment of sexual disorders and broaden their knowledge base about sexuality, an important component of most clients' quality of life. It is both a go-to resource for professional clinicians in their daily work and an ideal resource for students and practice-oriented continuing education.
