Dirk Bondy,Bryan Allred,2017-08-08 The book combines history with academic notes for use at the university level presenting design examples from actual jobs with applications and detailing for the practicing engineer Chapter 1 tells the history of post tensioned concrete as only Ken Bondy can tell it Chapters 2 8 are the notes Dirk Bondy uses to teach Design of Prestressed Concrete Structures at UCLA and Cal Poly San Luis Obispo Chapters 9 13 are design examples that address many of the decisions faced by practicing engineers on typical projects Chapters 13 14 cover the art of detailing and observing the construction of post tensioned concrete This knowledge was obtained over many years of working on our own projects and listening and learning from the the pioneers of post tensioned concrete Chapter 15 covers the slab on grade industry which represents more sales of post tensioning tendons than all other post tensioning applications combined Chapter 16 discusses the challenging application of post tensioning external post tensioning Prestressed Concrete Charles W. Dolan,H. R. (Trey) Hamilton,2018-11-14 This textbook imparts a firm understanding of the behavior of prestressed concrete and how it relates to design based on the 2014 ACI Building Code It presents the fundamental behavior of prestressed concrete and then adapts this to the design of structures The book focuses on prestressed concrete members including slabs beams and axially loaded members and provides computational examples

to support current design practice along with practical information related to details and construction with prestressed concrete. It illustrates concepts and calculations with Mathcad and EXCEL worksheets. Written with both lucid instructional presentation as well as comprehensive rigorous detail, the book is ideal for both students in graduate level courses as well as practicing engineers.

Federation for Structural Concrete, 2021-04-01 Since the Second World War the demand of energy has undergone an exponential growth that has led to a sharp annual increase in the use of natural gas in both cities and thermal power stations Nowadays the strategic relevance of natural gas as a main source of energy is evident with a contribution of more than 20% of the total world consumption This development in increasing demand of natural gas has led for a need of suitable storage and transportation infrastructure Various gases especially hydrocarbons are preferably stored in liquid form for transportation and storage since the phase transformation from gas to liquid comes with a significant reduction of the volume e g up to 600 times Gases can be liquefied by raising the pressure or by cooling to their boiling point which for most gases is below 0 °C This is known as cryogenic storage The term cryogenic is derived from two Greek words namely kryos meaning icy cold and genes which can be translated as shape These fib recommendations are concerned about post tensioning systems used in cryogenic tanks and have been formulated on the basis of actual available knowledge with the aim to reflect the current state of the art Consequently these recommendations have included a classification of the different cryogenic tanks typologies used in the past and nowadays the associated different tendon types depending on their exposure to low temperature e g never only accidentally or during normal tank operation and the testing regime required for acceptance of the materials and the post tensioning system according to this document An international working group comprising more than 20 experts from administrative authorities universities laboratories owners structural designers suppliers of prestressing steels and post tensioning systems suppliers have actively contributed in order to develop these recommendations This text has been written to cover best construction practices around the world and to provide material specifications which are considered to be the most advanced available at the time of preparing this text For ease of use for Owner Designer and Post tensioning System Supplier the content has been arranged systematically according to the system components into chapters focusing on performance characteristics requirements and acceptance criteria **3rd fib**
