Action Research from Concept to Presentation: a Practical Handbook to Writing Your Master's Thesis Peter K. Lynch, Ryan C. Welch, 2014-07-03. Perhaps the most daunting graduate school requirement is the development of an action research Masters thesis. This capstone task requires unprecedented amounts of time, energy, and verbiage. Designed to take stress out of the thesis writing equation, this student-friendly, comprehensive handbook glides the reader through a 28-step process from developing a focal topic to defending a scholarly thesis. Framing each chapter as a one-week action assignment, the authors have broken down the process into manageable chunks to enable students, writers, to achieve an immediate sense of completion at every step. By using this scaffolding approach, the authors encourage the student researcher to focus on one part of the process rather

than the total sometimes overwhelming final product With the exception of the Review of the Literature section which takes several weeks to complete all other thesis sections can and should be timed out for seven days The Authors primary objective was to empower the student researcher to accomplish each of the steps in the process while never losing sight on the product that will help the children in their classrooms Whether developing an Abstract or writing in text citations student researchers are guided throughout the nuances of the Publication Manual of the American Psychological Association's 6th Edition
