Swedenborg,1882 *Corporal Punishment of Children: A Human Rights Violation* Susan Bitensky,2006-06-14 The core of this book is a detailed analysis of the status of corporal punishment of children including Areasonable spankings by parents under international human rights law The analysis leads compellingly to the conclusion that such punishment is indeed a human rights violation consonant with modern norms about right and decent treatment of juveniles The book further provides a comparative analysis between the domestic laws of the seventeen nations that ban all corporal punishment of children Sweden Finland Norway Austria Cyprus Denmark Germany Iceland Bulgaria Croatia Latvia Hungary Romania Ukraine Israel Italy and Portugal and examples of the domestic laws in the countries that still permit some physical chastisement of children United States and Canada Because it is anticipated that a good number of readers will be surprised to learn that this disciplinary practice has become a human rights law violation the book also engages in an in depth exegesis of the psychological evidence and historical and philosophical reasons warranting prohibition of all corporal punishment of children as an imperative policy choice The work probes as well why once that choice is made it is essential to use legal bans on the punishment inasmuch as they have uniquely effective pedagogical and therapeutic roles and give some permanence to humanity s hard won understanding about protecting the young from violence Published under the Transnational Publishers imprint **Arcana Cœlestia** Emanuel Swedenborg,1873 **The Citizen and the Neighbor** Charles Fletcher Dole,1889

They cover a wide range of topics, many of which address ties between political and moral philosophy and what the law does and should provide. A broad general theme is that in all these domains, what really is the wisest approach to difficult circumstances often depends on the particular issues involved and their context. Both judges and scholars too often rely on abstract general formulations to provide answers. A notable example in political philosophy was the suggestion of the great and careful scholar John Rawls that laws should be based exclusively on public reason. The essays explain that, given uncertainty of what people perceive as the line between public reason and their religious convictions, the inability of public reason to resolve some difficult questions such as what we owe to higher animals and the feeling of many that their religious understanding should count, urging exclusive reliance on public reason is not a viable approach. Other essays show similar problems with asserted bases for legal interpretations and the content of provisions such as the First Amendment. *Universalism Against Itself*
