Q.7. Read the passage carefully and answer the questions in your own words.

India considers itself as a secular democratic nation, because it wants to tell the world that they are civilized and liberal nation. What it is doing in Kashmir is Brutal and ugly, because the Indian government is curbing the voice of the people of Kashmir through sheer force with the help of army and police. The Modi government has passed a recent law with the help of the Indian parliament and has changed the status of Kashmir and made it part of India. It means that it no more consider state of Kashmir a disputed area between India and Pakistan. It has violated all international UN charters. It has divided state of Jammu and Kashmir into three regions. The people of Kashmir have no access to the outside world, because India does not want that civilized world come to know about its tyranny in the state. Surprisingly, the conscience of the so-called civilized world is dead.

Questions:

1. What image India wants to show to the world? (02)
2. How the voice of Kashmiri people controlled by India? (02)
3. in how many parts state of Jammu and Kashmir divided by India? (02)
4. Suggest a suitable title and make a precise of the above passage. (09)

Q.8. Translate into English. (10)

economics is perceived as an integral part of social phenomena in the International Conference of Political Economy ICOPEC Accordingly even if economic institutions and relations form the foundations of society in the contemporary world economic development is dependent on social power and dynamics while economic policies per se are shaped by not only technical processes but also diverse interests and choices Within this context politics is involved in every encounter between different economic classes social groups and genders being shaped by the visions of a better life as the subject matter of philosophy ethics and religion and at times it finds its best expression in art Law on the other hand is the embodiment of all social relations which are in their essence political Thus this conference does not reduce society to market relations only despite positioning the economy in the heart of social relations Above all it considers the society as a political entity Indeed everything constitutes the subject matter of politics The arguments in favour of purifying market relations from the influence of politics and the discourse that they take place on their own right serve to disguise the conflicts of interest and power asymmetries inherent therein This conference regards man as homo politicus as Aristoteles put it rather than homo economicus In 2016 ICOPEC conferences were turned into a conference series with its 7th conference and the main theme of the 7th conference was determined as State Economic Policy Taxation and Development IJOPEC Publication has undertaken to publish selected papers presented at this conference in English and Turkish in five different edited books In the 90s the phenomena of globalization managed to dominate political popular and academic debates While reading a newspaper or a book watching television surfing the Internet or participating in a demonstration we come across the links of globalization in our everyday lives Globalization as a wide term is variously blamed or credited with a huge range of negative effects e g it is often related to social problems ranging from famine to floods from pollution to poverty and from rural depopulation to urban overcrowding On the contrary globalization can be also considered as the source of success in development for instance decrease in the poverty levels economic prosperity and growth better services and enhanced awareness of human rights Nevertheless some sceptics of the benefits from globalization have also described the potential ways in transforming political economic and social relations within and between countries This transformation may lead to the benefit of human welfare worldwide T smail iriner Bryan Christiansen Julia Dobрева Introduction Political Economy of Globalization Financialization Stockhammer 2013 One key component is the magnificent growth of the financial sector Greenwood although to a softer scope similar processes can also be observed in other OECD countries Philippon Reshel 2013 The financial rise has its base in the deregulation and liberalization of the financial and economic system From this point of view financialization is the cause rather than the effect This is the major difference compared to the other approaches Financialization can affect the macro economy through four main channels These are income distribution investment in capital stock household debt and net exports and current account balances As a correction it is discussed that economic structures governed by financialization should be addressed on four dimensions a re regulation and reduction of the financial sector b redistribution

of income from top to bottom and from capital to labour c re orientation of macroeconomic policies to stabilize domestic demand at non inflationary full employment levels and eventually d re creation of international monetary and economic policy coordination

Food Security and Soil Quality Rattan Lal,B.A. Stewart,2010-06-23 Just five years ago it was generally believed that the number of food insecure people in the world was on continuous decline Unfortunately widespread soil degradation along with resistance to recommended agronomic practices and little attempt to restore degraded soils have conspired with significant droughts in regions that could least tolerat *Principles of Sustainable Soil Management in Agroecosystems* Rattan Lal,B.A. Stewart,2013-06-10 With the use of high level soil management technology Africa could feed several billion people yet food production has generally stagnated since the 1960s No matter how powerful the seed technology the seedling emerging from it can flourish only in a healthy soil Accordingly crop yields in Africa South Asia and the Caribbean could be doubled or tripled through adoption of technologies based on laws of sustainable soil management *Principles of Sustainable Soil Management in Agroecosystems* describes the application of these laws to enhance ecosystem services while restoring degraded soils and promoting sustainable use With chapters contributed by world class soil scientists ecologists and social scientists this book outlines critical changes in management of agricultural soils necessary to achieve food security and meet the food demands of the present and projected future population These changes include conversion to no till and conservation agriculture adoption of strategies of integrated nutrient management water harvesting and use of drip sub irrigation complex cropping farming systems such as cover cropping and agroforestry and use of nano enhanced fertilizers The book is based on the premise that it is not possible to extract more from a soil than what is put into it without degrading its quality The strategy is to replace what is removed respond wisely to what is changed and be pro active to what may happen because of natural and anthropogenic perturbations The chapters which exemplify these ideas cover a range of topics including organic farming soil fertility crop symbiotic soil microbiota human driven soil degradation soil degradation and restoration carbon sink capacity of soils soil renewal and sustainability and the marginality principle
