Finding Ultimate Reality David W. Gooding, John C. Lennox, 2018-11-16 We need a coherent picture of our world Life's realities won't let us ignore its fundamental questions but with so many opposing views how will we choose answers that are reliable In this series of books David Gooding and John Lennox offer a fair analysis of religious and philosophical attempts to find the truth about the world and our place in it By listening to the Bible alongside other leading voices they show that it is not only answering life's biggest questions it is asking better questions than we ever thought to ask In Book 2 Finding Ultimate Reality they remind us that the authority behind ethics cannot be separated from the truth about ultimate reality Is there a Creator who stands behind his moral law Are we the product of amoral forces left to create moral consensus Gooding and Lennox compare ultimate reality as understood in Indian Pantheistic Monism Greek Philosophy and Mysticism

modern computer To solve one of the great mathematical problems of his day Alan Turing proposed an imaginary programmable calculating machine But the idea of actually producing a thinking machine did not crystallise until he and his brilliant Bletchley Park colleagues built devices to crack the Nazis Enigma code thus ensuring the Allied victory in the Second World War In so doing Turing became a champion of artificial intelligence formulating the famous and still unbeaten Turing test that challenges our ideas of human consciousness But Turing s work was cut short when as an openly gay man in a time when homosexuality was illegal in Britain he was apprehended by the authorities and sentenced to a treatment that amounted to chemical castration Ultimately it lead to his suicide and it wasn t until 2013 after many years of campaigning that he received a posthumous royal pardon With a novelist s sensitivity David Leavitt portrays Turing in all his humanity his eccentricities his brilliance his fatal candour while elegantly explaining his work and its implications
