**Understanding Experimental Planning for Advanced Level Chemistry** Kim Seng Chan, Jeanne Tan, 2015 This book is a continuation of authors previous six books Understanding Advanced Physical Inorganic Chemistry Understanding Advanced Organic and Analytical Chemistry Understanding Advanced Chemistry Through Problem Solving Vol I II Understanding Basic Chemistry and Understanding Basic Chemistry Through Problem Solving retaining the main refutational characteristics of the previous books with the strategic inclusion of think aloud questions to promote conceptual understanding during an experimental planning These essential questions would make learners aware of the rationale behind each procedural step the amount of chemical used and types of apparatus that are appropriate for the experiment The book provides a fundamental important scaffolding to aid students to create their own understanding of how to plan an experiment based on the given reagent and apparatus It guides the students in integrating the various concepts that they have learnt into a coherent and meaningful conceptual network during experimental planning Existing A level or IB guidebooks generally introduce concepts in a matter of fact manner This book adds a unique pedagogical edge which few can rival This book is essential and useful in order for students to be adequately prepared for

their high stake examinations
