## Point Pelee Bird Report:

*Birding at Point Pelee* Henrietta O'Neill, 2006-10-03 A birder's history of one of Canada's most famous birding spots. Birding at Point Pelee traces Point Pelee's story from the 1870s to the national park's establishment in 1918 to present day when as many as 50 000 birders visit the park in May during spring migration. The book portrays the backdrop against which the park was evolving: the scientific discoveries and changes in ornithological methods through the decades; early specimen collecting; bird banding; the development of binoculars and telescopes; the growth of nature photography; the shift from birding as science to birding as hobby; as well as philosophical shifts and debates about amateur versus professional credentials and the balance to strike between conservation and recreation. Thoroughly researched and lively, the story takes readers from the earliest days when the birders were few but fervent to today's international tourism phenomenon.

Today's binoculars and spotting scopes are much improved on those available thirty years ago. Websites like eBird can help keep track of bird sightings and let the novice know when and where to find more birds. Applications like Merlin help with visual and sound identification. Field guides are now fully illustrated with colour plates as opposed to a few pages in the oldest field guides. If you have ever thought you would like to know more about birding, this could be the introduction you have been seeking.
