

How to attach the T56H transmitter on the horse

First of all, identify the 2 electrode pads on each side of the transmitter. The electrode with veins on the back is the positive electrode and typically the other electrode is the negative electrode. In the middle you'll find the HeartRate transmitter probe.

The transmitter pads are very small electrical needles, welded by the heart and for the transmitter to read the heart rate properly, we need to ensure a good contact to the horse's skin. Make sure you use the electrode properly, the integrated springs will keep up some pressure, but you still need to use it to ensure a good contact. If your horse has a thick winter coat, you can shave the spot where you will place the electrode, this will greatly improve the heart rate signal quality.

Make sure the transmitter is not too tight or too loose. The wires under the horse's skin should be visible under the horse's skin. The rider's weight will keep the electrode in place.

Using contact gel on the electrode pads of the T56H transmitter is highly recommended. It ensures a better detection of the horse's heart rate.

The ElectroGel pads are also available in a smaller size, which is a better conductivity. Non-flammable formula and not harmful to the skin after lengthy contact.

Here is an example of conductive gel recommended by the biggest electrode manufacturers, to be used on multifunctional electrodes.

Frequently Asked Questions

The Heart Rate Seems to be Wrong?

- Make sure that the positions of the electrodes are correct.
- Make sure that the horse's coat under the electrodes is thoroughly removed.
- Accumulated sweat and dirt may interfere with the measurement of the signal from the heart to the transmitter. Check if the electrodes need cleaning.
- Make sure that the transmitter is firmly attached to the electrode pad.
- In some cases, at about 120 bpm a double pulse can occur at each heartbeat (R + T waves). This problem disappears when the intensity increases.

- If at all you can cause irritation of the electrodes. Wash the electrodes with water and soap solution, and then dry them carefully after each use. If you use the silver-colored flares on the electrode facing, your sports electrode set needs to be replaced. Ask your retailer for part # 90007161 Polar Equine Electrodes for Bluetooth transmitter.

The Watch Receiver Display is Blank or Fading?

- Have the battery (checked) by the appointed Polar Distributors - Polar authorized service center.

Care and Maintenance of the Transmitter

- The Polar Equine T56H transmitter is active only when the electrodes are in contact with the horse's coat and the transmitter attached to the electrode pad.
- Sweat and moisture can leave the electrodes wet and the transmitter activated, which empties the battery life. Therefore, clean the electrodes and let them dry after use and **detach the transmitter from the electrode pad.**
- Make sure that the electrodes (conductors) are not in contact.

- Get on the electrode wearers the contact between a horse's body and the electrodes. To ensure good operation, wash the electrodes regularly with a mild soap and water solution. **However, never use alcohol or any chemicals such as steel wool or polishing chemicals.** They will cause permanent damage to the electrodes.
- The material used for electrodes and straps is very soft and comfortable. Use care of these parts to prevent any damage. Electrodes should be replaced by an authorized Polar service personnel.
- For details, contact your dealer or distributor.

Starting training

You are now ready to start. Starting from the time display, press ON twice.

The stopwatch starts, a heart symbol appears and the heart rate is displayed in the bottom of the screen. From now on, the POLARSCA is recording your exercise.

Each display shows 5 rows of data and is named after the bottom row.

To check the data you are most interested in, change display by pressing **UP** or **DOWN**. All different displays are set by default but can be set manually - see user manual.

You can also scroll on a data to make it larger on the display.

Press and hold **UP** for 2 seconds to scroll in the data of the top row, or **DOWN** for 2 seconds to scroll in the data of the bottom row. Press and hold the same button for 2 seconds to scroll out.

To stop the exercise, press **STOP** twice. The POLARSCA returns to time display.

All the data has been recorded and can be reviewed in the list. To access the list, press **UP** once from time display and then validate by pressing **ON**.

For more detailed information on how the POLARSCA 161 Equine works, please check the user manual included in the box.
