and the distributed nature of networks partly because of the convergence of communications technologies but mainly because of sheer complexity and diversity of networks and services. The TM Forum's Solutions Frameworks NGOSS help address these challenges by providing a framework for the development of management applications those software applications that provide the building blocks for management solutions. The members of the TM Forum have elaborated many parts of NGOSS to make it practical including in the area of information modeling process analysis and contract definition. This book further elaborates NGOSS by examining the challenging area of interface design. One of the costs of deploying a new service is the cost of integrating all the necessary applications into an effective software solution to manage the service. This cost has been dubbed the integration tax and can turn out to be five times the capital cost of procuring the management software in the first place. From their long experience of the design and standardization of management applications the authors have extracted a core set of design patterns for the development of effective and consistent interfaces to management applications. Adopting these patterns across the industry could reduce the learning curve for software developers and allow service providers and systems integrators to rapidly and reliably deploy management solutions and thereby markedly reduce the integration tax.

WfMC Chair Keith Swenson states "A platform for digital transformation brings a number of different capabilities together: processes, agents, integration, analytics, decisions, and perhaps most important, case management." In this book you will learn how support of adaptive data-driven processes empowers knowledge workers to know in real time what is happening at the edge points and to take actions through the combination of rule-driven guidance and their own know-how. It is not a traditionally automated system but intelligent adaptability where technology doesn't replace human decision making but extends the reach of the knowledge worker making data actionable. In award-winning case studies covering industries as diverse as law enforcement, public safety, transportation, insurance, banking, state services, and healthcare you will find instructive examples for how to transform your own organization. Leading industry analysts study the awards entries for emerging industry trends. Read the chapter "The Seven Trends Impacting The Case Management Landscape" by Connie Moore, Digital Clarity Group. This important book follows these ground-breaking best sellers on ACM: *Best Practices for Knowledge Workers Thriving on Adaptability*, *Empowering Knowledge Workers*, *Taming the Unpredictable*, *How Knowledge Workers Get Things Done*, and *Mastering the Unpredictable* and provides important papers by thought leaders in this field together with practical examples.
