book brings together contributions from a team of leading scholars and practitioners that discuss a diverse range of interrelated topics and issues relevant to stalking and intrusive behavior from both theoretical and practical contexts. Whereas most of the literature on the subject is written from a Western viewpoint, this unique volume examines empirical research policies and practices from Asian and African countries as well as those from Europe, the Americas, and Australia to provide a truly global perspective. Divided into three parts, the book first examines theories and research on cross-national differences in stalking among college students, ex-partner stalking in Finland, cyberstalking victimization in Singapore, the heterogeneity of stalking and stalkers in Australia, public familiarity and understanding of stalking, harassing legislation in Australia, the United Kingdom, and the United States, and more. The book's second part focuses on national portraits of stalking in a number of understudied populations including Lithuania, Spain, Denmark, Portugal, and South Africa. Finally, in the third section of the book, the chapters largely emphasize policy and best practice, including the Dutch model of policing stalking, risk assessment and management of stalking in Sweden, psycho-legal responses to online interpersonal harm, the German approach to stopping stalking, the United Kingdom response to assessing and managing stalking, and the work of the Danish Stalking Centre. This important contribution to the field offers insights from international professionals applicable in other geographical contexts. Discusses the factors that influence social awareness and responses to stalking. Explores the importance of victim vulnerability factors when managing risk of stalking. Presents real-world case studies of stalking behavior, intimate partner violence, stalking victimization, and statutory and law enforcement efforts. Reviews the intervention practices of the support institutions and justice systems of different countries. **Psycho-Criminological Approaches to Stalking Behavior: The International Perspective** is an ideal primary or supplementary text for courses in criminology, criminal justice, forensic psychology, and social and behavioral science, as well as a valuable source of reference for those who deal with offenders or victims of stalking, including law enforcement agents, mental health professionals, legal practitioners, social services personnel, and policy makers.

It serves as a leading point of reference in the area relating to participation in crime and identifies the need for a consistent approach to the doctrinal and theoretical underpinnings of complicity liability. With a section on the UK analysing points of current interest, the book also has a large comparative section dealing with foreign jurisdictions and examines on the basis of a unified research grid how different legal systems treat core issues of participation in the context of criminal law. This book is a valuable reference resource for those in the criminal justice community in the UK and abroad and for academics, the judiciary, and policy makers.
