**Service Sociology and Academic Engagement in Social Problems** A. Javier Treviño, Karen M. McCormack, 2016-04-01 This book challenges sociologists and sociology students to think beyond the construction of social problems to tackle a central question What do sociologists do with the analytic tools and academic skills afforded by their discipline to respond to social problems Service Sociology posits that a central role of sociology is not simply to analyse and interpret social problems but to act in the world in an informed manner to ameliorate suffering and address the structural causes of these problems This volume provides a unique contribution to this approach to sociology exploring the intersection between its role as an academic discipline and its practice in the service of communities and people With both contemporary and historical analyses the book traces the legacy characteristics contours and goals of the sociology of service shedding light on its roots in early American sociology and its deep connections to activism before examining the social context that underlies the call for volunteerism community involvement and non profit organisations as well as the strategies that have promise in remedying contemporary social problems Presenting examples of concrete social problems from around the world including issues of democratic participation poverty and unemployment student involvement in microlending disaster mitigation the organization and leadership of social movements homelessness activism around HIV AIDS and service spring breaks Service Sociology and Academic Engagement in Social Problems explores the utility of public teaching participatory action research and service learning in the classroom as a contribution to the community

**Ethics and Governance** Patrick K. Kalifungwa, 2025-08-12 As the title suggests The Right and the Good is about rightness goodness and their relation to each other Ross W D 2002 Rightness is a property of acts while goodness concerns various kinds of things According to Ross there are certain features that both have in common they are real properties they are indefinable pluralistic and knowable through intuition Skelton Anthony 2012 Central to rightness are prima facie duties for example the duty to keep one's promises or to refrain from harming others Simpson David L William David Ross 2021 of special interest for understanding goodness is intrinsic value what is good in itself Ross ascribes intrinsic value to pleasure knowledge virtue and justice Skelton Anthony 2012 It is easy to confuse rightness and goodness in the case of moral goodness An act is right if it conforms to the agent's absolute duty Ross W D 2002 Doing the act for the appropriate motive is not important for

rightness but it is central for moral goodness or virtue Burgh W G de 193 Ross uses these considerations to point out the flaws in other ethical theories for example in G E Moore s ideal utilitarianism or in Immanuel Kant s deontology Ross defends a realist position about morality the moral order expressed in prima facie duties is just as real as the spatial or numerical structure expressed in the axioms of geometry or arithmetic Ross W D 2002 Furthermore the terms right and good are indefinable Skelton Anthony 2012 This means that various naturalistic theories trying to define good in terms of desire or right in terms of producing the most pleasure fail Forthcoming Books Rose Arny,2001 *SOCIAL SYSTEMS AND TRANSFORMATION OF SOCIETY* Patrick K. Kalifungwa,2025-03-19 All knowledge including the most basic taken for granted common sense knowledge of everyday reality is derived from and maintained by social interaction In their model people interact on the understanding that their perceptions of everyday life are shared with others and this common knowledge of reality is in turn reinforced by this interaction Social structure can also be said to be the framework upon which a society is established It determines the norms and patterns of relations between the various institutions of the society Social norms are believed to influence social structures through relations between the majority and the minority As those who align with majority are considered normal and those who align with the minority are considered abnormal majority minority relations create a hierarchical stratification within social structures that favors the majority in all aspects of society Social theory by definition is used to make distinctions and generalizations among different types of societies and to analyze modernity as it has emerged in the past few centuries Social thought provides general theories to explain actions and behavior of society as a whole encompassing sociological political and philosophical ideas Social transformation in this context requires a shift in collective consciousness of a society local state national or global so that reality is refined by consensus This often happens by external stimulus and sometimes intentionally Social transformations are such when they sustain overtime where attitudes and values are held in a completely new context or paradigm based upon different assumptions and beliefs Mindset is an established set of attitudes especially regarded as typical of a particular group social or cultural values the outlook philosophy or values of a person now also more generally frame of mind attitude frecte and disposition A mindset may also arise from a person s world view or philosophy of life Ideas are just thoughts but implementing and acting on these ideas in our own lives is what will make it habitual and allowing a change in mind set
