Thriving Systems Theory And Metaphor Driven Modeling:

Thriving Systems Theory and Metaphor-Driven Modeling Leslie J. Waguespack, 2010-10-01 How is it that one system is more effective appealing satisfying and or more beautiful than another to its stakeholder community This question drove Christopher Alexander's fifty year quest to explain great physical architecture and gave birth to pattern languages for building that underpin much of modern systems engineering How is it that so many individual stakeholders consistently recognize the same quality the same beauty in a system This question led George Lakoff to research the role of conceptual metaphor in human understanding What is essential to stakeholders satisfaction with systems Fred Brooks in his publications addressed this question This monograph fuses these diverse streams of thought in proposing Thriving Systems Theory by translating Alexander's properties of physical design quality into the abstract domain of information systems and modeling Metaphor Driven Modeling incorporates the theory while examining its impact throughout the system life cycle modeling design and deployment The result is holistic and innovative a perspective on system quality invaluable to students practitioners and researchers of software and systems engineering

Designing Thriving Systems Leslie J. Waguespack, 2019-04-10 This monograph illuminates a design mindset for systems artefacts that not only survive but thrive Of itself an artefact is devoid of design quality until encountered in a specific social context by human attendants Design quality is the affect of an intertwining of a an artefact's structural and behavior properties b an attendant humanly conception of quality an appreciative system and c the enfolding social context of their encounter To pursue quality in design is to interweave these three strands bound as a durable cord that evokes a visceral satisfaction or the delight of a ringing musical chord The human consciousness of design quality is fundamentally metaphoric and dynamic a perception of reality mediated by a personal value disposition In the continuum of experience living moment after moment both the attendant's metaphorical appreciation and their sense of quality evolve And thus design quality issues from perpetual concentric cycles of design construct experience learn assess calibrate over the life span of relationship with an artefact Design as a verb's purpose is to service the life in that relationship sustain its survival and hopefully raise that life to a state of thriving Design quality manifests throughout the cycles of design as a verb rather than as a product of it Such is the mindset in which the designer must indwell and that design education must nurture While all artefacts are systems the domain of artefact design of which I am most experienced is computing systems Therefore I will rest upon that domain to explore a theory and practice of design as a verb designing thriving systems

Beyond the Informal Ninik Suhartini, Paul Jones, 2023-01-01 This book provides a much needed analysis of the pivotal role of the urban kampung in Indonesia's urbanization process and importantly provides a deeper understanding of how these communities create their complex socio physical environments through self organization The book challenges the current formal approaches and practices to modern planning in Indonesia where many kampungs are classed as illegal and excluded from city plans Beyond informality unpacks via three case studies the self generated planning and development arrangements and mechanisms which occur parallel to processes of formal exclusion adaptation negotiation and modification Kampungs are posited as inseparable urban entities contributing to the complex assemblage of the city and the dynamics of contemporary urban planning and design In the context of planning and design practice this book provides a better understanding on how one needs to consider human scale urbanism to achieve more effective and efficient planning plans and policies in the self organized city Even though self organization by residents comes with its challenges as outlined in the book formal planning in both Indonesia and other developing countries has much to learn from understanding self organized settlements kampung and informal settlements as they are

Oscillations of Literary Theory A. C. Facundo, 2016-10-04 Revises key psychoanalytic concepts that influence interpretive practices in the humanities and formulates a new approach to reading fiction *Oscillations of Literary Theory* offers a new psychoanalytic approach to reading literature queerly one that implicates queer theory without depending on explicit representations of sex or queer identities By focusing on desire and identifications A C Facundo argues that readers can enjoy the text through a variety of rhythms between two eroticized positions the paranoid imperative and queer reparative Facundo examines the metaphor of rupture as central to the logic of critique particularly the project to undo conventional formations of identity and power To show how readers can rebuild their relational worlds after the rupture Facundo looks to the themes of the desire for omniscience the queer pleasure of the text loss and letting go and the vanishing points that structure thinking Analyses of Nabokov's *Lolita* Danielewski's *House of Leaves* Findley's *The Wars* and Ishiguro's *Never Let Me Go* are included which model this new approach to reading Armed with a full repertoire of psychoanalytic resources Facundo navigates the paranoid reparative debate in literary studies with greater finesse than any critic I've read Reframing current critical impasses *Oscillations of Literary Theory* makes substantial contributions to narrative theory and aesthetics by illuminating their crucial connections with sexuality and pleasure Facundo offers us here nothing less than a new method of reading queerly Tim Dean University of Illinois Urbana Champaign This book seeks to understand hermeneutic imperatives and flights from these in terms of paranoid and reparative drives as distinct from affect It is a bold and ambitious project but Facundo brings to it an exceptional array of skills I am impressed by the author's close subtle and very canny readings of both theoretical and literary texts and by her demonstration of the complexity variety and centrality of ideas and operations of paranoia and the reparative in writings from Freud to the present *Oscillations* revitalizes
