Report To Congressional Requesters Southwest Border Security:

Southwest Border: More Timely Border Patrol Access and Timing Could Improve Security Operations and Natural Resource Protection on Federal Lands , **Border Patrol: Key Elements of New Strategic Plan Not Yet in Place to Inform Border Security Status and Resource Needs** Rebecca Gambler, Joshua Akery, Lacinda Ayers, Barbara A. Guffy, Brian J. Lipman, Susan A. Sachs, 2013-01-09 In fiscal year 2011 the Department of Homeland Security DHS reported data meeting its goal to secure the land border with a decrease in apprehensions our data analysis showed that apprehensions decreased within each southwest border sector and by 68 percent in the Tucson sector from fiscal years 2006 to 2011 due in part to changes in the U S economy and achievement of Border Patrol strategic objectives These data generally mirrored the decrease in estimated known illegal entries across locations Other data are used by Border Patrol sector management to assess efforts in securing the border against the threat of illegal migration drug smuggling and terrorism and Border Patrol may use these data to assess border security at the national level as the agency transitions to a new strategic plan Our analysis of these data indicated that in the Tucson sector there was little change in the percentage of estimated known illegal entrants apprehended by Border Patrol over the past 5 fiscal years and the percentage of individuals apprehended who repeatedly crossed the border illegally declined across the southwest border by 6 percent from fiscal years 2008 to 2011 Additionally the number of drug seizures increased from 10 321 in fiscal year 2006 to 18 898 in fiscal year 2011 and apprehensions of aliens from countries determined to be at an increased risk of sponsoring terrorism increased from 239 in fiscal year 2006 to 309 in fiscal year 2010 but decreased to 253 in fiscal year 2011 The Tucson sector scheduled more agent workdays in fiscal year 2011 for enforcement activities related to patrolling the border than other sectors however data limitations preclude comparison of overall effectiveness in how each sector has deployed resources to secure the border In fiscal year 2011 the Tucson sector scheduled 73 percent of agent workdays for enforcement activities and of these activities 71 percent were scheduled for patrolling within 25 miles of the border Other sectors scheduled from 44 to 70 percent of agent enforcement workdays for patrolling the border Border Patrol sectors assess how effectively they use resources to secure the border but differences in how sectors collect and report the data preclude comparing results Border Patrol issued guidance in September 2012 to improve the consistency of sector data collection and reporting which may allow future comparison of performance Border Patrol is developing key elements of its 2012 2016 Strategic Plan needed to define border security and the resources necessary to achieve it but has not identified milestones and time frames for developing and implementing performance goals and measures in accordance with standard practices in program management Border Patrol officials stated that performance goals and measures are in development for assessing the progress of agency efforts to secure the border between the ports of entry and since fiscal year 2011 DHS has used the number of apprehensions on the southwest border as an interim goal and measure However as GAO previously testified this

interim measure does not inform program results and therefore limits DHS and congressional oversight and accountability. Milestones and time frames could assist Border Patrol in monitoring progress in developing goals and measures necessary to assess the status of border security and the extent to which existing resources and capabilities are appropriate and sufficient. Border Patrol expects to implement other key elements of its strategic plan over the next 2 fiscal years. Why GAO Did This Study. Within DHS, U.S. Customs and Border Protection's CBP Border Patrol has primary responsibility for securing the border between ports of entry and reported that with its 18,500 agents it apprehended over 327,000 illegal entrants at the southwest border in fiscal year 2011. Across Border Patrol's nine southwest border sectors, most apprehensions occurred in the Tucson sector in Arizona. GAO was asked to review how Border Patrol manages resources at the southwest border. This report examines: 1) apprehension and other data Border Patrol collects to inform changes in border security for the southwest border and the Tucson sector; in particular, 2) how the Tucson sector compares with other sectors in scheduling agent deployment and to what extent data show that deployments have been effective; and 3) the extent to which Border Patrol has identified mechanisms to assess resource needs under its new strategic plan. GAO analyzed DHS documents and data from fiscal years 2006 to 2011 and interviewed officials in headquarters and five southwest border sectors selected based on cross-border illegal activity among other things. Results cannot be generalized across the southwest border but provided insights into Border Patrol operations. GAO recommends that CBP ensure Border Patrol develops milestones and time frames for developing border security goals and measures to assess progress made and resource needs. DHS concurred with these recommendations.

Border security agencies need to better coordinate their strategies and operations on federal lands : report to congressional requesters. , *Border Security* United States. General Accounting Office, 2004

Report to Congressional Requesters U. S. Government Accountability Office, 2015-01-07. The federal government has taken a number of steps to combat threats posed by drug cartels, including potential crime and violence directed against U.S. citizens and government interests. For example, in 2008 the U.S. government began a program known as the Mrida Initiative to provide Mexico and the countries of Central America with financial and technical assistance for counterdrug efforts among others. In March 2009, as a response to the violence in Mexico, DHS announced a new southwest border initiative to guard against violent crime spillover into the United States by increasing the deployment of personnel and technology along the southwest border.

Secure Border Initiative Richard M. Stana, 2010. In November 2005, the Dept. of Homeland Security announced the launch of the Secure Border Initiative (SBI), a multiyear, multibillion-dollar program aimed at securing U.S. borders and reducing illegal immigration. The U.S. Customs and Border Protection's (CBP) SBI program is responsible for developing a comprehensive border protection system using technology known as SBInet and tactical infrastructure, including fencing, roads, and lighting. This report addresses: 1) the extent to which CBP has implemented SBInet and the impact of delays that have occurred; and 2) the extent to which CBP has deployed

tactical infrastructure and assessed its results Includes recommendations Charts and tables **Border Security, 2015**

Walls Said Saddiki,2017-10-09 We re going to build a wall Borders have been drawn since the beginning of time but in

recent years artificial barriers have become increasingly significant to the political conversation across the world Donald Trump was elected President of the United States while promising to build a wall on the Mexico border and in Europe the international movements of migrants and refugees have sparked fierce discussion about whether and how countries should restrict access to their territory by erecting physical barriers Virtual walls are also built and crushed at increasing speed In the post 9 11 era there is a greater danger from so called transnational non state actors and computer hacking and cyberterrorism threaten to overwhelm our technological barriers In this timely and original book Said Saddiki scrutinises the physical and virtual walls located in four continents including Israel India the southern EU border Morocco and the proposed border wall between Mexico and the US Saddiki s detailed analysis explores the tensions between the rise of globalisation which some have argued will lead to a borderless world and the end of the nation state and the rapid development in recent decades of border control systems Saddiki examines both regular and irregular cross border activities including the flow of people goods ideas drugs weapons capital and information and explores the disparities that are reflected by barriers to such activities He considers the consequences of the construction of physical and virtual walls including their impact on international relations and the rise of the multi billion dollar security market World of Walls The Structure Roles and Effectiveness of Separation Barriers is important reading for all those interested in the topics of immigration border security international relations and policy

Borders and Border Walls Andréanne Bissonnette,Élisabeth Vallet,2020-09-17 This book addresses the recent evolution of borderlines around the world as an attempt to control transnational movements with a view to securitization of borders rooted in the need to control mobility and preserve national identities This book moves beyond physical borders and studies new manifestations of borders such as technological and symbolic walls It brings together scholars from various academic fields such as geography political science and border studies to examine the various movements functions and articulations of international borders It explores two main issues how international borders have become enforced lines of demarcation and division reinforcing national identity and impacting national and regional dynamics and the material and immaterial discursive and concrete expressions of borders and the impacts of the transformation of bodies into threat to be monitored as daily lives become sites of border enforcement Offering multidisciplinary insights on the growing phenomenon of border walls this book will be of interest to undergraduate and postgraduate students of Border Studies European Studies International Relations Political Geography and Regional Studies

The Land of Open Graves Jason De Leon,Michael Wells,2015-10-23 In his gripping and provocative debut anthropologist Jason De Le n sheds light on one of the most pressing political issues of our time the human consequences of US immigration policy The Land of Open Graves reveals the suffering and deaths that occur daily in the Sonoran Desert of Arizona as thousands of undocumented migrants attempt to cross the border from Mexico into the United States Drawing on the four major fields of anthropology De Le n uses an innovative combination of ethnography archaeology linguistics and forensic

science to produce a scathing critique of Prevention through Deterrence the federal border enforcement policy that encourages migrants to cross in areas characterized by extreme environmental conditions and high risk of death For two decades this policy has failed to deter border crossers while successfully turning the rugged terrain of southern Arizona into a killing field In harrowing detail De Le n chronicles the journeys of people who have made dozens of attempts to cross the border and uncovers the stories of the objects and bodies left behind in the desert The Land of Open Graves will spark debate and controversy
