

A high-magnification scanning electron micrograph (SEM) showing a complex, textured surface. The surface is dark brown to black, with numerous small, bright yellow and orange spots scattered across it. A prominent, lighter-colored, irregularly shaped feature runs diagonally from the upper left towards the center. The overall appearance is granular and heterogeneous, typical of a soil or mineral interface.

Soils as a Key Component of the Critical Zone 5 Christian Valentin, 2019-02-06 One third of the world's soils have already been degraded The burden on the land continues to grow under the combined pressures of demography urbanization artificialization and mining and there are increased demands on agricultural land changing dietary preferences land speculation as well as new demands for agroenergy fiber green chemistry and more Resulting issues such as soil crusting water and wind erosion soil salinization and soil acidity therefore constitute a major threat The authors of this book present the main processes and factors of soil degradation different ways to prevent it and methods of rehabilitation The book also deals with the origin and processes of metallic and organic soil pollution as well as methods of phytoremediation and restoration It is one of the few books to explore the issue of soil artificialization and urban soil management and to highlight how agricultural and urban waste can be used to amend and fertilize cultivated soils

Soils as a Key Component of the Critical Zone 6 Philippe Lemanceau, Manuel Blouin, 2019-02-06 Soils are environments where a myriad of different organisms evolve determining a series of functions which translate into ecosystem services that are essential for humanity Improving our understanding of these organisms their biodiversity and their interactions with each other as well as with the environment represents a major challenge Soil ecology has its roots in natural history The ecological approach focused on soils is notable for integrating at least partially the contributions of soil sciences physics chemistry biochemistry By renewing methods of observation and analysis especially molecular ones and through the development of experimental approaches and modeling an ecology connected with other soil based disciplines emerges and begins to influence aboveground ecology Soils as a Key Component of the Critical Zone 6 presents an updated vision of knowledge and research in soil ecology as a complex system from the best French specialists
