# DT175A

In 1974, the DT175A is a completely new kind of Trail Blazer. Many of the lessons learned in Yamaha's highly successful motorcycle design have been applied to make it much more comfortable around all the road. The new double loop motorcycle-type frame carries the engine lower for better stability. And the unusual 180-degree of

the frame, coupled with a softer rear swing arm and a new base design, makes the DT175A trail and turn like a superbike.

The carburetor and piston port timing have been further refined this year for more lasting power at low rpm's. This is an engine which stands for the remarkable 100 miles

per gallon made possible by Torque Injection. From the new high-mounted polyurethane front fender to the new fender struts, the DT175A is a better all-around bike. And still one of the toughest lightweight street bikes around.
