

Video input to this unit is output to a TV using output jacks of the same kind.

When you have made connections using different types of video such as HDMI and component video, make the same connection with your TV. When viewing, be sure to switch the input source on your TV to match the playback device.

If your TV has multiple inputs, connect with the following priority (A to C).

### Listening to TV audio

To playback TV audio on this unit, connect the TV audio output to this unit.

Connect the following input jacks, matching the audio output jacks on your TV. When viewing your TV, select the appropriate input source on this unit.

Audio output from TV	Input jack on this unit
Optical digital output	AV1 or AV4
Coaxial digital output	AV2 or AV3
Analog output	AV5, AUDIO1, AUDIO2, or V-AUX
HDMI Audio Return Channel (Described in the right column)	HDMI OUT

\* Connecting to AV4 allows you to playback TV audio just by pressing the "TV" under "SCENE" key.

When using an HDMI compatible TV that supports Audio Return Channel functions and / or HDMI Control functions (Ex. Panasonic VIERA Link), you can enjoy the TV sound on this unit as follows:

#### When using a TV that supports the Audio Return Channel functions and HDMI Control functions

The audio / video output from the unit to the TV and audio output from the TV to the unit are possible using a single HDMI cable. The input source is switched automatically to match operations carried out on the TV, and that makes TV sound control easier to use.

For the connections and settings, refer to "Single HDMI cable input to TV audio with Audio Return Channel function" in Owner's Manual.

#### When using a TV that supports HDMI Control functions

When HDMI Control functions are enabled on the unit, input source can be switched automatically to match operations carried out on the TV. For the connections and settings, refer to "Switching the input source on this unit automatically when listening to TV audio" in Owner's Manual.
