Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a

growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i e extending the implementation and knowledge of co design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation

The Cambridge Handbook of Computing Education Research Sally A. Fincher, Anthony V. Robins, 2019-02-21 This Handbook describes the extent and shape of computing education research today Over fifty leading researchers from academia and industry including Google and Microsoft have contributed chapters that together define and expand the evidence base The foundational chapters set the field in context articulate expertise from key disciplines and form a practical guide for new researchers They address what can be learned empirically methodologically and theoretically from each area The topic chapters explore issues that are of current interest why they matter and what is already known They include discussion of motivational context implications for practice and open questions which might suggest future research The authors provide an authoritative introduction to the field which is essential reading for policy makers as well as both new and established researchers

The Research Probe TRP is a proceedings publication of institutional conferences and research competitions. It focuses on four broad themes: education and development studies, humanities and social sciences, science technology engineering and mathematics, and business management and accounting. This publication provides a platform for experts and practitioners from various fields in the dissemination of their research works that address industry trends and needs, scientific findings, and international concerns. Both the institutional conferences and proceedings publication promote a wider horizon for researchers through open access paradigm. TRP publishes articles employing any of the various research methods and strategies. It accepts any specific topic within these broad subjects. It also encourages interdisciplinary articles that broadly discuss key topics relevant to the core scope of the journal.

Post Covid 19 Learning Recovery S. Veena, Covid 19 has impacted and changed the education sector to a different level. Due to the widespread effects of COVID 19, schools and other educational institutions had to close. In an effort to lessen the effects of COVID 19, the majority of governments first chose to temporarily close schools. Children's learning has suffered as a result of the pandemic's prolonged school closures. In this way, a whole school year has passed with little to no curriculum learning in the present class. However, this is merely one type of learning loss. The pervasive problem of pupils forgetting what they learned in a previous session is equally concerning because it represents a setback in their academic learning. This involves losing fundamental skills that are the cornerstone of additional learning, such as reading comprehension and addition and multiplication, which they had previously mastered. Systemic, diverse, and well-coordinated activities are necessary for learning recovery. In addition to focusing on teacher capacity and support and disseminating ideas that all instructors can apply, the strategy needs to be comprehensive and long-term. For learning recovery to be effective, equitable, and long-lasting, it must also be transformational. The foundation of curriculum reform is meaningful learning and teaching coupled with an awareness of the system's capacity to implement the reform stages as effectively as possible. Curriculum reform is not a stand-alone process. Whether it's a learner-centered, spiral, technology-centered, or curriculum for the twenty-first century, any curriculum that adheres to pedagogy is appreciated. It is vital to plan and organize the shift so that it incorporates the core topics of reading and numeracy and also establishes a connection between the learner and his or

her surroundings and culture By putting such strategies into practice the failure factors of curricular reform will be slowed down The idea that the present is the best predictor of the future will help support groups choose and create a curriculum that equips kids to deal with the fallout from challenging circumstances such as the pandemic and others of a similar nature Long term gains in children s learning however depend on pre service teachers education being of higher quality Children s learning may be enhanced by strengthening the ICT environment for instruction but only if teachers ICT competencies are also improved To connect the learning of children with the professional development of teachers more study is required Students learning may benefit from increased teacher motivation brought about by certification programmes pay structure modifications improved school leadership and more transparent evaluation procedures As a result the book covers a wide range of important subjects pertaining to education in the post pandemic era such as how to establish a strong rapport between students and teachers systemic interventions that reframe teachers roles as edupreneurs the effects of digital technology on the teaching learning process techniques for filling in knowledge gaps in curricula pedagogy and assessments and safeguards for private school sustainability All those with an interest in the post pandemic recovery of schools with a focus on creating a fair inclusive and comprehensive national education system may find the book to be a useful resource

Teaching Girls Peter Kuriloff, Shannon Andrus, Charlotte Jacobs, 2017-12-01 Women continue to be underrepresented in the high paying fields of science math and engineering They receive only about 80% of the salary of men holding similar jobs in any field and still face glass ceilings that limit their attainment How do we educate and empower girls to surmount these barriers and succeed throughout their lives This unique book reveals the kinds of teaching that engages girls intellectually fosters their creativity and bolsters their confidence Drawing on descriptions of great lessons written by nearly 2 000 students and teachers it offers a practical accessible guide to anyone who wants to find better ways to help young women succeed The authors review the special qualities of lessons that resonate with girls and show how they meet their developmental needs throughout adolescence They also show how vital it is that such teaching happen within schools that help students learn about the numerous ways that gender affects girls development The authors conclude by detailing how school leaders can create cultures that support this kind of great learning and teaching **Towards a basic standard**
