

Photosynthesis: What's in a Leaf?

What is the relationship between structure and function in a leaf?

Why?

What would the world be like without leaves—no grass for ball fields, no beautiful landscaping? It would also mean no oxygen for animals and no food for heterotrophs. Leaves are like living machines that recycle the carbon and oxygen in our environment. This process, driven by the sun's energy, allows for a constant supply of oxygen and food for the inhabitants of Earth.

Model 1 – Leaf Sun-Catcher

General Equation for Photosynthesis

1. List three things entering the leaf in Model 1.
sunlight, carbon dioxide, water
2. List three substances leaving the leaf.
sugars, water (gas), oxygen
3. Which substance is both entering and leaving?
water
4. Veins are important structures that carry materials through the leaf. Label the central vein in the leaf diagram.
labeled in diagram
