Better By Design? Paul L. Knox,2020-10-09 The design professions architecture city planning landscape architecture and urban design share a great deal in terms of intellectual antecedents professional ideals and praxis In particular they share a commitment to creating better cities whether at the scale of buildings neighborhoods or city regions But who decides what constitutes a good city and how should such an ideal be implemented In Better by Design Paul Knox explores the intellectual roots of the design professions showing how architects planners and other designers have traditionally interpreted their roles and implemented their ideas in cities across North America and the UK Drawing on his long record of research and award winning publications on the social production of the built environment Knox offers a critical appraisal of their ultimate effectiveness in achieving the goal of creating and sustaining good cities

Enabling Eco-Cities Dominique Hes,Judy Bush,2018-02-27 Cities are striving to become more resilient adaptive and sustainable this requires new ways of governing and developing the city This book features chapters by

researchers using regenerative development and transitions theories to envisage how Eco Cities could be planned designed and created and concludes with practical tools and an outline of how this evolution could be facilitated It examines two major questions How can we use understandings of Eco Cities to address the legacy of urban built form and existing practices which often make it difficult to create the systemic changes needed And what are the elements of complex urban places and spaces that will enable the planning creation and evolution of thriving cities The book will appeal to planners city makers urban researchers students and practitioners including planners designers architects and sustainability managers and all those seeking to envisage the steps along the path to thriving cities of the future

**The Routledge Companion to Urban Regeneration** Michael E. Leary, John McCarthy, 2013-10-30 In the past decade urban regeneration policy makers and practitioners have faced a number of difficult challenges such as sustainability budgetary constraints demands for community involvement and rapid urbanization in the Global South Urban regeneration remains a high profile and important field of government led intervention and policy and practice continue to adapt to the fresh challenges and opportunities of the 21st century as well as confronting long standing intractable urban problems and dilemmas This Companion provides cutting edge critical review and synthesis of recent conceptual policy and practical developments within the field With contributions from 70 international experts within the field it explores the meaning of urban regeneration in differing national contexts asking questions and providing informed discussion and analyses to illuminate how an apparently disparate field of research policy and practice can be rendered coherent drawing out common themes and significant differences The Companion is divided into six sections exploring globalization and neo liberal perspectives on urban regeneration emerging reconceptualizations of regeneration public infrastructure and public space housing and cosmopolitan communities community centred regeneration and culture led regeneration The concluding chapter considers the future of urban regeneration and proposes a nine point research agenda This Companion assembles a diversity of approaches and insights in one comprehensive volume to provide a state of the art review of the field It is a valuable resource for both advanced undergraduate and postgraduate students in Urban Planning Built Environment Urban Studies and Urban Regeneration as well as academics practitioners and politicians

**The Ashgate Research Companion to Planning Theory** Patsy Healey, 2016-11-03 At a time of potentially radical changes in the ways in which humans interact with their environments through financial environmental and or social crises the raison d'être of spatial planning faces significant conceptual and empirical challenges This Companion presents a multidimensional collection of critical narratives of conceptual challenges for spatial planning The authors draw on various disciplinary traditions and theoretical frames to explore different ways of conceptualising spatial planning and the challenges it faces Through problematising planning itself the values which underpin planning and theory practice relations contributions make visible the limits of established planning theories and illustrate how by thinking about new issues or about issues in new ways spatial planning might be advanced both

theoretically and practically There cannot be definitive answers to the conceptual challenges posed but the authors in this collection provoke critical questions and debates over important issues for spatial planning and its future A key question is not so much what planning theory is but what might planning theory do in times of uncertainty and complexity An underlying rationale is that planning theory and practice are intrinsically connected The Companion is presented in three linked parts issues which arise from an interactive understanding of the relations between planning ideas and the political institutional contexts in which such ideas are put to work key concepts in current theorising from mainly poststructuralist perspectives and what discussion on complexity may offer planning theory and practice

*Markets, Politics and the Environment* Barry Goodchild, 2016-08-25 Markets Politics and the Environment answers three groups of question What is planning and as part of this What are its key features as a style of social practice and action and How does planning as a style of social practice relate to social and economic change How as part of the justification for planning might claims of valid technical knowledge be constructed What is meant by rational What is the contribution of pragmatism as a supplement or replacement to rationalism How might rationality and pragmatism be adapted to postmodernism and the requirements of diversity Finally how may concepts of planning be reoriented towards sustainable development as a collective duty How might sustainable development be reworked in relation to planning as a means of managing and stimulating change Each group of question is discussed in a separate chapter and is associated with different theories debates and examples of practice Markets Politics and the Environment concludes that the full implications of sustainable development and climate change point in the direction of a different type of state a green state whose future functioning can draw on planning theory but at present can only be conceived as a sketchy outline
