Salzman, Michael G. Lawler, 2021 In June 2018 the United States Conference of Catholic Bishops USCCB released the sixth edition of the Ethical and Religious Directives for Catholic Health Care Services ERD The ERD seeks to provide ethical guidelines grounded in moral law Church teaching and canon law to guide Catholic institutions in their provision of health care This book presents a critical commentary on the revised ERD arguing that the ERD is problematic in a number of ways First it continues to prioritize a rules based over a

person centered approach with an emphasis on absolute norms that proscribe particular acts Second the authors argue that the sex abuse scandal and its cover up has fundamentally undermined the Bishops credibility and yet the revised ERD omits this context and continues to emphasize the Bishop s authority over health care decisions Third the ERD does not take into account Pope Francis transformative papacy and plea for mutual understanding and dialog in implementing health care and in collaboration between Catholic and non Catholic health care providers Following this critique the authors propose new ways forward for US Catholic health care ethics First they suggest that the ERD should be grounded in the principle that human dignity is foundational to Catholic health care As there is pluralism in Catholic definitions of human dignity there must be pluralism in the norms or directives that facilitate realizing human dignity Second Pope Francis emphasis on the virtue of care should transition the ERD from a focus on specific directives and absolute norms to a focus on principles to guide patients and health care professionals as decision makers Third the authors argue that any future ERD must include consideration of climate change race refugees poverty and other social issues in its conception of health care ethics
