Thinking Through Mathematics Edward A. Silver, Jeremy Kilpatrick, Beth Schlesinger, Dennie Wolf, 1990 This document focuses on how mathematics teaching and learning can be improved by developing more powerful approaches to connect thinking and mathematics It proposes changing perspectives on what it means to learn and do mathematics and explores how these perspectives can be incorporated into the teaching of secondary school mathematics Chapter 1 offers a view of mathematics as emerging largely from individual and social activity rather than from textbooks worksheets and tradition The learner is depicted as someone who actively constructs meaning instead of passively receiving it Chapter 2 considers how a greater emphasis on communication discussion debate recording and writing stimulates and uncovers students learning and thinking and leads to

a deeper understanding by both teachers and students Chapter 3 explores how teachers might encourage greater inquiry and communication in a secondary school class by making minor but thought provoking changes in ordinary problems and situations Finally chapter 4 gives some practical advice on transforming the mathematics classroom into a place where students are expected not only to absorb and consume mathematics but also to produce and think about it Contains 17 references and 17 figures MKR **2nd Grade Mathematical Thinking: Reasoning and Proof** John

Theory of Point Estimation Erich L. Lehmann, George Casella, 2006-05-02 Since the publication in 1983 of Theory of Point Estimation much new work has made it desirable to bring out a second edition The inclusion of the new material has increased the length of the book from 500 to 600 pages of the approximately 1000 references about 25% have appeared since 1983 The greatest change has been the addition to the sparse treatment of Bayesian inference in the first edition This includes the addition of new sections on Equivariant Hierarchical and Empirical Bayes and on their comparisons Other major additions deal with new developments concerning the information in equality and simultaneous and shrinkage estimation The Notes at the end of each chapter now provide not only bibliographic and historical material but also introductions to recent development in point estimation and other related topics which for space reasons it was not possible to include in the main text The problem sections also have been greatly expanded On the other hand to save space most of the discussion in the first edition on robust estimation in particular L M and R estimators has been deleted This topic is the subject of two excellent books by Hampel et al 1986 and Staudte and

Sheather 1990 Other than subject matter changes there have been some minor modifications in the presentation

Mathematical Thinking and Problem Solving Alan H. Schoenfeld, Alan H. Sloane, 2016-05-06 In the early 1980s there was virtually no serious communication among the various groups that contribute to mathematics education mathematicians mathematics educators classroom teachers and cognitive scientists Members of these groups came from different traditions had different perspectives and rarely gathered in the same place to discuss issues of common interest Part of the problem was that there was no common ground for the discussions given the disparate traditions and perspectives As one way of addressing this problem the Sloan Foundation funded two conferences in the mid 1980s bringing together members of the different communities in a ground clearing effort designed to establish a base for communication In those conferences interdisciplinary teams reviewed major topic areas and put together distillations of what was known about them A more recent conference upon which this volume is based offered a forum in which various people involved in education reform would present their work and members of the broad communities gathered would comment on it The focus was primarily on college mathematics informed by developments in K 12 mathematics The main issues of the conference were mathematical thinking and problem solving
