history of the development of military diving operations 1 1 2 Scope This chapter outlines the hard work and dedication of a
number of individuals who were pioneers in the development of diving technology As with any endeavor it is important to

leader in the development of modern diving and underwater operations The general requirements of national defense and the
specific requirements of underwater reconnaissance demolition ordnance disposal construction ship maintenance search
rescue and salvage operations repeatedly give impetus to training and development Navy diving is no longer limited to

description of the clausal structure of German Sign Language DGS The structure of the book is based on the three clausal
layers CP IP TP and VoiceP The main hypothesis is that scopal height is expressed iconically in sign languages the higher the
scope of an operator the higher the articulator used for its expression The book was written with two audiences in mind On
the one hand it addresses linguists interested in sign languages and on the other hand it addresses cartographers **Report
