**P**olaris is celebrating its 30th anniversary in the snowmobile business. The machine that David Johnson built 30 years ago in Roseau, Minn., is far different than the Polaris models of today. Yet, the six models in the '85 Polaris lineup continue the proud heritage that started that day long ago when business partner Edgar Hetteen told Johnson: "We sold one, let's build another."

Neither Johnson nor Hetteen probably ever envisioned what their Snow Traveler would lead to. Certainly neither ever would have dreamed of something like the 1985 Polaris Indy 600. This awesome blend of high performance, ride

and handling is state-of-the-art snowmobiling for the go-fast crowd.

The 600 gets the new lightweight Polaris clutch this season, promising improved performance, reliability and long life. Engine cooling also has been improved, with a new bleeding system designed to prevent any possibility of airlock. Another change is a new air intake behind the windshield, which draws in cooler outside air for improved engine performance.

Not that the engine needs much improving. The liquid-cooled, triple-cylinder Polaris-Fuji engine kicks out gobs of snow churning horsepower and torque. Triple-carbs and superb Polaris

clutching complete the power-to-the-track equation. Hauling the ponies in is a liquid-cooled, hydraulic disc brake.

All that power would be useless, however, without the trend-setting Indy IFS chassis. The independent front suspension and long-travel rear suspension give the 600 the ability to maintain ride and handling control at top speed. A set of wheels has been added to the rear suspension for improved marginal snow performance. This year's 600 gets new blue striping and graphics to highlight its mean black paint job.

Thirty years in the snowmobile business is something special. To commemorate the occasion, Polaris will offer the
