Islamic Wealth Management Mohamed Ariff, Shamsheer Mohamad, 2017-12-29. From an Islamic perspective, although the ownership of wealth is with God, humans are gifted with wealth to manage it with the objective of benefiting the human society. Such guidance means that wealth management is a process involving the accumulation, generation, purification, preservation, and distribution of wealth, all to be conducted carefully in permissible ways. This book is the first to lay out a coherent framework on how wealth management should be conducted in compliance with guiding principles from edicts of a major world religion.

The Financial Consequences of Behavioural Biases Imad A. Moosa, Vikash Ramiah, 2017-10-25. This book provides a concise analysis of behavioural biases and their implications for financial decision making. The book is written in the normative tradition, arguing strongly for the superiority of behavioural finance with respect to explaining observed phenomena in financial markets. It offers some unique features, including a discussion of the issue of conspiracy theory and how behavioural biases lead to belief in conspiracy theories. Lingering belief in the principles of neoclassical finance is attributed in part to the doctrine of publish or perish, which dominates contemporary academia. The offshoots of behavioural finance are discussed in detail, including ecological finance, environmental finance, social finance, experimental finance, neurofinance, and emotional finance. A comprehensive discussion of narcissism is presented, where it is demonstrated that narcissistic behaviour is prevalent in the finance industry and that it led to the eruption of the global financial crisis.
