

Guided Notes on Rotation and Revolution

ROTATION KEY

The Earth's movement through **space** affects life on Earth. We experience **day and night** because of this movement on the Earth's **axis** known as **rotation**. It takes the Earth **24 hours** to rotate one time in which we experience **day and night**. The Earth's axis is an invisible line that **intersects** the Earth through both the **North and South Poles**.

REVOLUTION

The Earth moves along a path around the **Sun**. This path is known as an **orbit**. One complete trip on this path around the sun is known as a **revolution**. It takes the Earth **365 1/4 days** to complete it's journey around the Sun. Every **4 years**, we take the extra 1/4 days from the previous years, combine them and add an extra day to the calendar called **leap year (February 29th)**.
