complete with greasy pages and thumbprints and as such are deceptively described as pre owned used or even refurbished In addition they are often advertised for the incorrect series and or model years However VelocePress com has been publishing reprints of motorcycle and automobile manuals since 2003 and our publications have earned excellent reviews worldwide so you can be assured you are purchasing a quality product Royal Enfield Greg Pullen,2021-04-26 Royal Enfield s famous motor made like a gun hints at the factory s origins but few appreciate that it is the oldest motorcycle manufacturer in existence that can boast of continuous production In addition its famous Bullet can claim the longest motorcycle production run of all time Greg Pullen charts the rise fall and rise again of Royal Enfield from the company s pre motorcycle beginnings in Redditch through the impact of two World Wars the importance of exports to India and subsequent establishment of factories there to changes in ownership recently launched models and new concept bikes for the future With 190 colour photographs this book includes the V twins from the 1930s K and KX range to a glimpse of the concept V twin shown in 2018 the singles from 2 strokes to side valve 4 strokes and the ohv version that first used the Bullet name through to the new singles built in India The British Bullet its arrival in 1948 and production in the UK the original orders from India and subsequent setting up of production there are discussed The 250s 1958 68 including the Turbo Twins and the big twins from the 1948 500 Town to the final interceptor in 1970 including the 800cc prototype and the Clymer Indians are covered The new twins the 650cc Royal Enfield interceptor and Continental GT twins and the Bobber concept bike are discussed Competition success is covered with notable ISDT achievements star rider Johnny Brittain and racing the big twins and Geoff Duke in the GP5 Finally the British factories and the new opportunities with the Indian factories are remembered

Crusader The 350cc engine can be identified by its 10 fin barrel as compared to the 8 fin barrel of the 250cc models however it also featured revised internals a strengthened gearbox and Clipper style forks and in 1964 it received a new silencer and fuel tank The knowledgeable historians appear to agree that production ran from January 1963 to August 1965 which makes 1966 as the final model year However due to a number of different reasons production numbers are inconclusive as it is a known fact that the engine and frame numbering procedure did not follow a consistent pattern and at times was somewhat random Consequently there is some disagreement on the total production with less than 250 units the most commonly quoted number Royal Enfield was very adept at utilizing components across their entire model line and this sharing carried over into their workshop manuals Consequently many of the sections and illustrations are identified as being appropriate for various models and not necessarily specific to the particular model referenced in the manual title
