Cardiac Pacemaking in Health and Disease: From Genes to Function Pietro Mesirca, Alicia D'Souza, Futoshi Toyoda, Gerard J. J. Boink, 2022-04-28 **The Business of Transition** Melissa Crouch, 2017-10-26 A timely reflection on law development and economics through empirical and comparative perspectives on the case of Myanmar **Ca²⁺ Signaling and Heart Rhythm** Ming Lei, Christopher L.-H. Huang, R. John Solaro, Yunbo Ke, 2016-07-25 Ca²⁺ is a key second messenger in the intricate workings of the heart In cardiac myocytes Ca²⁺ signaling controls or modulates electrophysiological function excitation contraction coupling contractile function energy balance cell death and gene transcription Thus diverse Ca²⁺ dependent regulatory processes occur simultaneously within a cell Yet distinct signals can be resolved by local Ca²⁺ sensitive protein complexes and differential Ca²⁺ signal integration In addition to its importance to normal cardiac function such regulation is also crucial in disease conditions Ca²⁺ is likely involved in ectopic cardiac rhythms in both atrial and ventricular tissues through generating triggered activity often appearing as delayed afterdepolarisations particularly following cellular Ca overloading Recent studies also implicate Ca²⁺ in Na channel expression and properties with consequences for conduction velocity and therefore arrhythmic substrate At the cellular level such regulation involves control of the activity of membrane ion channels and Ca²⁺ handling proteins These in turn involve multiple extra and intracellular signaling pathways This e book

assembles review and original articles from experts in this field It summarises major recent progress bearing on roles of Ca²⁺ in cardiac electrophysiological function encompassing both normal and abnormal cardiac function These extend from physiological roles of Ca²⁺ signaling in pacemaker function in particular generation of sino atrial pacemaker potentials to pathological roles of abnormal Ca²⁺ signaling in both atrial and ventricular arrhythmogenesis It also seeks to bridge the gap between advances in basic science and development of new therapies

Imposing Sanctions on Violent Non-State Actors to Restore International Peace and Security Christopher Huber, 2022-06-06 In the last decades violent non state actors VNSAs such as rebel and terrorist organizations have proved their capacity to break international law The international community particularly the United Nations UN has reacted to this development by redirecting its conflict resolution efforts to these non state entities This has turned targeted sanctions into one of the most vital and indispensable foreign policy tools available to the UN Security Council in combating terrorism and contributing to the peaceful resolution of intra state conflicts Despite the UN Security Council s growing tendency to sanction VNSAs there

has been little research analyzing the effects of UN targeted sanctions on these non government actors This book seeks to fill this gap and shifts the focus on non state actors by ascertaining the general mechanisms through and conditions under which UN targeted sanctions imposed on VNSAs tend to be effective The tripartite empirical analysis combining quantitative and qualitative research methods demonstrates that the state centric understanding of how sanctions work is not simply applicable to the effective sanctioning of violent non state actors such as rebel and terrorist movements **Educating**

Migrant Children in Urban Public Schools in China Bo Hu,2018-06-15 This book investigates the implementation of the education policy for migrant children arguing that it has been selectively implemented while some policy themes have been effectively implemented others have not Four factors underlie this selective implementation specificity of policy goals funding for education local incentives in an exam oriented education system and intergroup relationships between migrant and urban children **War by Other Means** Angela Borozna,Lada V. Kochtcheeva,2024-02-29 This book analyzes the goals of Western

sanctions imposed on Russia from 2014 to 2023 It explores the effects of sanctions on the Russian economy and its political course as well as the repercussions of the sanctions to the senders and third parties including spillover effects on neighboring countries and boomerang effects on the senders While sanctions can be considered relatively effective in terms of economic damage the Russian economy is far from being crushed Importantly sanctions proved to be ineffective as an instrument of foreign policy They have failed to alter Moscow s resolve to continue its military operation and are unlikely to change it in the near future The effects of the sanctions extend well beyond their anticipated impact on Russia itself primarily due to the Western nations limited experience and knowledge in implementing sanctions against a major power with extensive global connections such as Russia Managing Leader Selection in European Political Parties Nicholas

Aylott,Niklas Bolin,2020-11-18 This book explores the varying ways in which political parties in Europe make arguably their most important decisions the selection of their leaders The choice shapes the representation of a party externally It also influences the management of internal conflict because there will always be some disagreement about the party s direction The rules of selection will naturally affect the outcome Yet there is more to it than rules Sometimes the process is open and fiercely contested Sometimes the field of potential leaders is filtered even before the decision reaches the selectorate the organ that according to party statutes formally makes the appointment The selectorate might have only a single candidate to ratify a so called coronation The book presents a framework for analysing both the formal and informal sides of leader selection and hones the framework through its application in a series of case studies from nine European countries

Inclusive Education: Global Issues and Controversies ,2020-06-29 This edited book considers the main issues and controversies within the current educational context of inclusive education from an international perspective Authorities in the field such as Norwich Kauffman and Boyle amongst many other international scholars provide an enticing insight into many of the issues and controversies around inclusive education and whether it is achievable or not We have reached a point

in time where inclusive education has been the prevailing doctrine for universal education policies. However, there are still many challenges facing those working within the inclusive education space, with some countries actually becoming less inclusive. International and national legislation has continued to move towards inclusive education, yet there seems to be many gaps between the philosophy and the principles of inclusive education and systemic practice. The book aims to address the current debates surrounding the implementation of inclusive education and also offers insights into the inconsistencies between policies and practices in inclusive environments. Moreover, it analyzes contemporary research evidence on the effectiveness of inclusion and identifies directions for future research. Contributors are Kelly Ann Allen, Dimitris Anastasiou, Joanna Anderson, Adrian Ashman, Jeanmarie Badar, Christopher Boyle, Jonathan M. Campbell, Heather Craig, Leire Darretxe, Julian Elliott, Zuri e Gaintza, Betty A. Hallenbeck, Divya Jindal, Snape Marguerite Jones, James M. Kauffman, George Koutsouris, Fraser Lauchlan, Gerry Mac Ruairc, Sofia Mavropoulou, Daniel Mays, Brahm Norwich, Angela Page, Kirsten S. Railey, and Federico R. Waitoller.

Syrian Chemical Weapons and International Law Tatsuya Abe, 2023-08-21. This is the first book to focus on international efforts to address Syrian chemical weapons issues in an international law context. It provides an overview of the process of control over Syrian compliance/non-compliance with international obligations, including the keys to success in eliminating Syria's stockpiles and reasons for difficulties in handling multiple uses of toxic chemicals as weapons in domestic armed conflicts. It also addresses collective and unilateral sanctions against Syria outside of international institutional frameworks and their implications for subsequent cases. Supported by extensive analyses of developments within the OPCW Executive Council and the UN Security Council, this book is recommended for readers seeking insight about chemical weapons issues and dynamism of international law.

Code of Federal Regulations, 2016. Special edition of the Federal Register containing a codification of documents of general applicability and future effect with ancillaries.

The Russian Challenge to the European Security Environment Roger E. Kanet, 2017-04-24. Roger Kanet, a respected expert on the Soviet Union and post-Soviet Russia, has assembled a stellar team of scholars from Russia and the West to examine Russia's policy toward Europe. The individual chapters offer well-researched provocative and contrasting assessments using theoretical frameworks ranging from realism to constructivism. Russia's annexation of Crimea and support for the rebellion in Ukraine's east have ignited a heated debate over the motivations and objectives shaping Russian policy in Europe. That makes this superb volume particularly timely.

Rajan Menon, Anne and Bernard Spitzer, Chair in Political Science, The City College of New York, USA. This edited collection examines the factors that have contributed to the growing conflict in Eurasia between the Russian Federation and the European Union and the United States. The individual chapters, written by authors with different national backgrounds, highlight the factors that have contributed to the emerging competition between the two sides that has culminated in the confrontation over Ukraine and Syria. It also deals with questions concerning the possible emergence of a new security environment in Europe and Eurasia.

A Guide to the World Anti-Doping Code Paul

David, 2017-04-24 An updated guide and commentary to the rules which regulate anti doping in sport including numerous case studies International Sanctions in Practice Antonio Bultrini, Francesco Giumelli, Clara Portela, Mirko Sossai, 2024-08-02 This book addresses key aspects relating to the use of international sanctions by assembling contributions from different fields of expertise with a view to providing readers with an interdisciplinary perspective Unilateral or plurilateral restrictive measures commonly referred to as sanctions by States or regional organizations have been acquiring an enormous practical importance in the last decades leading also to the institution of a European Union's sanctioning mechanism of its own In addition to that the war in Ukraine triggered by the Russian aggression has given them an unprecedented visibility including in the mainstream media The matter nevertheless remains particularly complex given its diverse implications from a legal as well as from an economic financial point of view and not least in a political perspective This book follows up the workshop that was held at the University of Florence on 9-10 December 2021 and collects original contributions from promising or acclaimed leading experts on sanctions Each part of the book is devoted to three main themes legality and legitimacy extraterritorial implications and effectiveness These parts consist of a dialogue between experts from different fields The book explores the legal basis of sanctions and how this impacts their legitimacy and the perception of their legitimacy It considers the complex implications of the extraterritorial effects that sanctions often produce or are even intended to produce as well as how effective they are in relation to different underlying aims It is hardly possible to tackle such key questions through a unique disciplinary lens This book thus represents an invitation to scholars experts and decision makers to adopt an interdisciplinary approach that can no longer be eluded
