can be combined in various ways to create new applications or extend existing ones SOA provides a number of benefits over traditional software design approaches including Increased agility SOA applications can be more easily modified and extended than traditional applications This is because SOA services are loosely coupled which means that they can be changed without affecting other parts of the application Improved interoperability SOA services are designed to be interoperable which means that they can be used by different applications and platforms This makes it easier to integrate SOA applications with legacy systems and third party applications Reduced costs SOA can help to reduce software development costs by promoting the reuse of services This is because SOA services can be used in multiple applications which eliminates the need to develop duplicate code
