United Nations Convention on the Law of the Sea Alexander Proelß, Amber Rose Maggio, Eike Blitza, Oliver Daum, 2022-11-15 The United Nations Convention on the Law of the Sea UNCLOS entered into force in 1994. Meanwhile it has been ratified by about 160 states including all the Member states of the EU and the EU itself. The Convention defines the rights and duties of states with regard to the use of the seas. UNCLOS consolidates customary international law and various conventions previously adopted by the international community. This Treaty, the most comprehensive ever concluded, is often referred to as the constitution for the seas. The commentary employs a systematic methodology whereby each provision is examined and analysed element by element. The issue of the suitability of the Convention to deal with the challenges facing the modern law of the sea, such as the exploration and exploitation of non-mineral resources or the protection of the marine environment in general, occupies a central editorial focus of this work. The commentary deals with all the provisions of the Convention article by article. Alexander Proelß is Professor of Public International Law at the University of Trier, specialising in the law of the sea. The authors are renowned experts on the law of the sea from all over the world.

Contemporary Ideas on Ship Stability Vadim L. Belenky, Kostas J. Spyrou, Frans van Walree, Marcelo Almeida Santos Neves, Naoya Umeda, 2019-01-01 This book contains a selection of research papers presented at the 11th and 12th International Ship Stability Workshops, Wageningen 2010 and Washington DC 2011, and the 11th International Conference on Stability of Ships and Ocean Vehicles, Athens 2012. The book is directed toward the ship stability community and presents innovative ideas concerning the understanding of the physical nature of stability failures and methodologies for assessing ship stability. Particular interest of the readership is expected in relation with appearance of new and unconventional types of ships. Assessment of stability of these ships cannot rely on the existing experience and has to be based on the first principles. As the complexity of the physical processes responsible for stability failure have increasingly made time domain numerical simulation the main tool for stability assessment, particular emphasis is made on the development and application of such tools. The included papers have been selected by the editorial committee and have gone through an additional review process with at least two reviewers allocated for each. Many of the papers have been significantly updated or expanded from their original version in order to best reflect the state of knowledge concerning stability at the time of the book's publication. The book consists of four parts: Mathematical Model of Ship Motions in Waves, Dynamics of Large Motions, Experimental Research and Requirements, Regulations and Operations.

The IMLI Treatise On Global Ocean Governance David Joseph Attard, Rosalie P. Balkin, Donald W. Greig, 2018-07-11 The 1982 United Nations Convention on the Law of the Sea (UNCLOS) remains the cornerstone of global ocean governance. However, it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically. With seemingly no opportunity for revision due to the Convention's burdensome amendment provisions, complementary mechanisms dealing with

such aspects of global ocean governance including maritime transport fisheries and marine environmental sustainability have been developed under the aegis of the United Nations and other relevant international organizations This approach is inherently fragmented and unable to achieve sustainable global ocean governance In light of the Sustainable Development Goals SDGs particularly Goal 14 the IMLI Treatise proposes a new paradigm on the basis of integrated and cross sectoral approach in order to realise a more effective and sustainable governance regime for the oceans The volume examines how the IMO with 171 Member States and 3 Associated Members has and continues to promote the goals of safe secure sound and efficient shipping on clean oceans It studies the interface and interaction between UNCLOS and IMO instruments and how IMOs safety security and environmental protection conventions have contributed to global ocean governance including the peaceful order of the polar regions
