An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

Cicely Saunders David Clark, 2018 Born at the end of World War One into a prosperous London family Cicely Saunders struggled at school before gaining entry to Oxford University to read Politics Philosophy and Economics As World War Two gained momentum she quit academic study to train as a nurse thereby igniting her lifelong interest in caring for others Following a back injury she became a medical social worker and then in her late 30s qualified as a physician By now her focus was on a hugely neglected area of modern health services the care of the dying When she opened the world's first modern hospice in 1967 a quiet revolution got underway Education research and clinical practice were combined in a model of total care for terminally ill patients and their families that quickly had a massive impact In Cicely Saunders A Life and Legacy David Clark draws on interviews correspondence and the publications of Cicely Saunders to tell the remarkable story of how she pursued her goals through the complexity of her personal life the skepticism of others and the pervasive influence of her religious faith When she died in 2005 her legacy was firmly established in the growing field of hospice and palliative care which had now gained global recognition

Annual Performance Report for the Ministry of Education and Training for the Financial Year ... Swaziland. Ministry of Education and Training,2014 **Political Knowledge in the Czech Republic** Pat Lyons,2017-06-01

The book examines the origins nature and impact of different facets of political knowledge in the Czech Republic between 1967 and 2014 The central argument presented in this book is that evaluating citizens on the basis of objective or factual knowledge alone makes little sense What citizens know about politics comes from a variety of sources that are complementary This is the first detailed study of how much Czechs know about politics and why it matters Here are some of the key findings of this book There are many forms of political knowledge Citizens make decisions using different forms of political knowledge Czechs knowledge of politics has remained constant over time How people answer knowledge questions in surveys matters Political knowledge is shaped by personality traits Factual knowledge is linked with forecasting social change but is not always linked with making correct voting Experts with high levels of knowledge do not agree on what is a correct answer **Policy, Professionalization, Privatization, and Performance Assessment** Theresa J. Gurl,Limarys Caraballo,Leslee Grey,John H. Gunn,David Gerwin,Héfer Bembenutty,2016-02-19 This volume reviews the background of mandated teacher performance assessment with an emphasis on policy privatization and professionalization The authors discuss the potential impact of mandated teacher performance assessments on teacher education in the content areas of mathematics English and social studies The perspectives and empirical research examined in this conceptual analysis illustrate the various ways in which the Stanford Center for Assessment Learning and Equity SCALE Teacher Performance Assessment edTPA promises to restructure teacher education in the United States The authors consider both the affordances and the constraints that teacher performance assessments offer for teacher preparation programs and conclude by discussing the implications of the intersections among policy privatization professionalization and performance assessments of teachers as well as the relationship between performance assessments and teacher education The impact of the edTPA on the development of signature pedagogies in teacher education is also discussed The UK Regional-National Economic Problem Philip McCann,2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional

development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government
