**Computer Recognition Systems** Marek Kurzynski, Edward Puchala, Michal Wozniak, Andrzej Zolnierrek, 2007-12-13 th This book contains papers accepted for presentation at the 4 International Conference on Computer Recognition Systems CORES 05 May 22 25 2005 Rydzyna Castle Poland This conference is a continuation of a series of conferences on similar topics KOSYR organized each second year since 1999 by the Chair of Systems and Computer Networks Wroclaw University of Technology An increasing interest to those conferences paid not only by home but also by foreign participants inspired the organizers to transform them into conferences of international range Our expectations that the community of specialists in computer recognizing systems will find CORES 05 a proper form of maintaining the tradition of the former conferences have been confirmed by a large number of submitted papers Alas organizational constraints caused a necessity to narrow the acceptance criteria so that only 100 papers have been finally included into the conference program The area covered by accepted papers is still very large and it shows how vivacious is scientific activity in the domain of computer recognition methods and systems It contains various theoretical approaches to the recognition problem based on mathematical statistics fuzzy sets morphological methods wavelets syntactic methods genetic algorithms artificial neural networks ontological models etc Most attention is still paid to visual objects recognition however acoustic textual and other objects are also considered Among application areas medical problems are in majority recognition of faces speech signals and textual information processing methods being also investigated

**Hands-On Combinatorics** Brian Hopkins, 2025-01-29 This book provides an active learning approach to combinatorial reasoning and proof through a thoughtful sequence of low threshold high ceiling activities A novel feature is its narrative format with much of the text written from the perspective of a student working through the material with peers Furthermore each chapter includes detailed notes for the instructor such as additional scaffolding extensions and notation for more advanced students The exposition is complemented by over 300 colorful illustrations The main focus of the book is the study of integer compositions with forays into graph theory and recreational mathematics Befitting the constructive nature of the book compositions are represented by trains made up of cars By physically constructing these objects students become proficient in hands on verifications of numerous identities Developed by a recipient of the MAA's Haimo Award for Distinguished Teaching and used in several teacher professional development workshops and college courses the book has very modest prerequisites In particular no prior experience with symbolic formalism is presumed allowing this material to be

used in multiple classroom settings from enrichment activities for secondary school students through undergraduate classes in discrete mathematics The structure of the book also makes it conducive to self study Get ready to build some trains and explore the enlightening world of combinatorial proofs Hands On Combinatorics is a wonderful book cleverly designed for readers of all mathematical levels With eye catching illustrations Brian Hopkins creates beautiful bijections and clever combinatorial arguments with binomial coefficients Fibonacci numbers and beyond Arthur T Benjamin Harvey Mudd College co author of Proofs That Really Count *Handbook of Parametric and Nonparametric Statistical Procedures* David J. Sheskin, 2003-08-27 Called the bible of applied statistics the first two editions of the Handbook of Parametric and Nonparametric Statistical Procedures were unsurpassed in accessibility practicality and scope Now author David Sheskin has gone several steps further and added even more tests more examples and more background information more than 200 pages of n **Ontology Learning and Population** Paul Buitelaar, Philipp Cimiano, 2008 The Semantic Web will only be a reality if we can create structured unambiguous ontologies that model domain knowledge that computers can handle This book provides automatic extraction and modeling techniques for ontology building Conceptual Modeling ER'99 Jacky Akoka, Mokrane Bouzeghoub, Isabelle Comyn-Wattiau, Elisabeth Metais, 2003-07-31 This book provides a comprehensive state of the art in conceptual modeling It grew out of research papers presented at the 18th International Conference on Conceptual Modeling ER 99 and arranged by the editors The plan of the conference is to cover the whole spectrum of conceptual modeling as it relates to database and information systems design and to offer a complete coverage of data and process modeling database technology and database applications The aim of the conference and of these proceedings is to present new insights related to each of these topics This book contains both selected and invited papers The 33 selected papers are organized in 11 sessions encompassing the major themes of the conference especially schema transformation evolution and integration temporal database design views and reuse in conceptual modeling advanced conceptual modeling business process modeling and workflows data warehouse design Besides the selected papers 3 invited papers present the views of three keynote speakers internationally known for their contribution to conceptual modeling and database research and for their active role in knowledge dissemination Peter Chen presents the results of his ongoing research on ER model XML and the Web Georges Gardarin presents the first results of an ESPRIT project federating various data sources with XML and XML QL Finally Matthias Jarke develops a way to capture and evaluate the experiences gained about process designs in so called process data warehouses Understanding Advanced Statistical Methods Peter Westfall, Kevin S. S. Henning, 2013-04-09 Providing a much needed bridge between elementary statistics courses and advanced research methods courses Understanding Advanced Statistical Methods helps students grasp the fundamental assumptions and machinery behind sophisticated statistical topics such as logistic regression maximum likelihood bootstrapping nonparametrics and Bayesian methods The book teaches students how to properly model think critically and design their own studies to avoid

common errors It leads them to think differently not only about math and statistics but also about general research and the scientific method With a focus on statistical models as producers of data the book enables students to more easily understand the machinery of advanced statistics It also downplays the population interpretation of statistical models and presents Bayesian methods before frequentist ones Requiring no prior calculus experience the text employs a just in time approach that introduces mathematical topics including calculus where needed Formulas throughout the text are used to explain why calculus and probability are essential in statistical modeling The authors also intuitively explain the theory and logic behind real data analysis incorporating a range of application examples from the social economic biological medical physical and engineering sciences Enabling your students to answer the why behind statistical methods this text teaches them how to successfully draw conclusions when the premises are flawed It empowers them to use advanced statistical methods with confidence and develop their own statistical recipes Ancillary materials are available on the book's website

*The Oxford Handbook of Value Theory* Iwao Hirose, Jonas Olson (College teacher), 2015 Value theory or axiology looks at what things are good or bad how good or bad they are and most fundamentally what it is for a thing to be good or bad Questions about value and about what is valuable are important to moral philosophers since most moral theories hold that we ought to promote the good even if this is not the only thing we ought to do This Handbook focuses on value theory as it pertains to ethics broadly construed and provides a comprehensive overview of contemporary debates pertaining not only to philosophy but also to other disciplines most notably political theory and economics The Handbook's twenty two newly commissioned chapters are divided into three parts Part I Foundations concerns fundamental and interrelated issues about the nature of value and distinctions between kinds of value Part II Structure concerns formal properties of value that bear on the possibilities of measuring and comparing value Part III Extensions finally considers specific topics ranging from health to freedom where questions of value figure prominently

[ECOOP '88 European Conference on Object-Oriented Programming](#) Stein Gjessing, Kristen Nygaard, 1988-07-19 The field of Object Oriented Programming OOP has attracted increasing attention during the last few years OOP is now recognized as an important tool for making better and more flexible information systems This book is the proceedings of the second European Conference on Object Oriented Programming ECOOP 88 that was held in Oslo Norway from August 15 to 17 1988 The objectives of ECOOP 88 were to present the best international work in the field of OOP to interested persons from industry and academia and to be a forum for the exchange of ideas and the growth of professional relationships Each of the 103 papers submitted was subject to a thorough refereeing process The 22 papers selected are collected in these proceedings together with one invited paper These 23 papers from 13 different countries comprise the currently best international work in the field of OOP The contents of the papers include areas such as Theory Languages Didactics Implementation Applications Concurrency and Databases The interest in object oriented programming is rapidly increasing especially within the areas of Concurrency and Databases With its 5 papers on

concurrency and 7 papers on databases the proceedings contain important new material on these subjects This book is a must for persons who want to keep themselves up to date in the field of OOP      *Casing a Promised Land, Expanded Edition* H. L. Goodall,1994-07-27 Now available for the first time in paperback and expanded by a new chapter and an afterword entitled Surrendering to the Mystery or The Sooner You Arrive the Further You Have to Go this ground breaking study by H L Goodall Jr examines what happens when a communication scholar ventures out of academia into the community workplace Using the techniques of social science and literary journalism Goodall reveals the tensions between order and creativity in the real world and how these tensions place him into a crisis of interpretation Becoming an Organizational Detective the first chapter is a brief autobiographical sketch of how Goodall moved from the role of cultural outsider to that of cultural insider within the high technology texts and contexts of Huntsville Alabama Against this backdrop he explores the lives led by people within organizations against the backdrop of his own many storied story Through the use of an interpretive field method cultural ethnography Goodall utilizes these many storied stories to provide a richer deeper sense of the experience of a researcher observing and interpreting organizational lives His stories take on the form of six detective mysteries in which the narrator figures into the plot of the intrigue and then works out its essential patterns In the first mystery Notes on a Cultural Evolution The Remaking of a Software Company Goodall looks at the transition of the Huntsville regional office of a Boston based computer software company where the lives and social dramas of the participants reflect the current state of high technology a blend of fantasy and stress stemming from that fantasy that mingle with his own InThe Way the World Ends Inside Star Wars Goodall penetrates the various defenses of the Star Wars command office in Huntsville to discover its secrets and surprises Lost in Space The Layers of Illusion Called Adult Space Camp illustrates how a supposedly innocent theme park invites participation in rituals and ceremonies designed to influence a future generation of taxpayers In Articles of Faith Goodall enters a super mall in Huntsville noting how shopping centers provide consumers and narrators with far more than places to purchase goods and services How I Spent My Summer Vacation finds Goodall back in a conference of communication scholars where he demonstrates the difficult task of translating cultural understandings from one context to another through the telling of his own tale In The Consultant as Organizational Detective Goodall works within a context of intrigue and deceit worthy of Raymond Chandler as he evaluates relationships of power and authority within a privately held company whose owner has targeted a contentious manager for removal preferably through voluntary resignation and dupes Goodall into the general deception In the final chapter Goodall shares how his study fits into or rubs against the grain of contemporary communication scholarship and offers unusual advice for others who may be considering making the interpretive turn      **Associative Computing** Jerry L. Potter,2012-12-06 Integrating associative processing concepts with massively parallel SIMD technology this volume explores a model for accessing data by content rather than abstract address mapping      **The Conceptual Structure of Reality** Gal Yehezkel,2014-05-22 This book describes a novel conception of

reality one that uniquely incorporates an idealistic view of existence with an account of objectivity It introduces a general model of conceptual analysis and demonstrates its effectiveness in exposing and establishing the existence of conceptual ties The book begins by introducing the tools and principles needed for the conceptual analysis undertaken in chapters that follow Next it presents a detailed examination into existence contingency idealism self consciousness and natural laws In the process the author critically examines the conceptions of existence held by Kant Frege and Russell argues that the determinations of past present and future are subjective in the sense that they imply the existence of consciousness in relation to which they are fixed shows that every possible reality includes sufficient conditions for self consciousness and confronts the question of the uniformity of nature which states that reality is subject to natural laws In the end the idealistic conception of reality developed in this book implies that existence is relative rather than absolute in the sense that it is determined in relation to a point of view internal to reality This view of existence implies that reality necessarily exists
