## RCRN04GR

### Universal Remote Control Owner's Manual

Manual del Propietario (parte posterior)

#### SAVE THIS MANUAL AND THE CODE LISTS!

Remote controls can sometimes lose their programming when you change the batteries. Make sure you keep the manual and code lists in a safe place so that you can reprogram the remote if you need to.

**Tip:** This remote is already programmed to operate most RCA-branded TVs, DVD players, and satellite receivers. Just press the corresponding key—DVD/VCR for a DVD player, TV for a television, SAT+CSL-DTC for a satellite receiver.

## Step 1: Install your batteries

Your universal remote requires two AAA alkaline batteries (not included).

#### To install the batteries:

1. Remove the battery compartment cover.
2. Insert the batteries, matching the batteries to the (+) and (-) marks inside the battery compartment.
3. Push the battery cover back into place.

#### Battery Precautions:

- Do not mix old and new batteries.
- Do not mix alkaline, standard (carbon-zinc) or rechargeable (nickel-cadmium) batteries.
- Always remove old, weak or worn-out batteries promptly and recycle or dispose of them in accordance with Local and National Regulations.

#### Battery Saver

Your universal remote control saves battery power by automatically turning off if any key is pressed for more than 50 seconds. This saves your battery life should your remote get stuck in a place where the keys remain depressed, such as between sofa cushions.

## Step 2: Program your remote

To use this universal remote with your home entertainment system, first you need to program it to control your devices. There are four ways you can program the universal remote to operate your devices:

- The **Auto Code Search** goes automatically through all the codes for the device you're trying to control. It's the easiest method, but it can sometimes take longer than some of the other programming methods.
- The **Brand Code Search** searches through the codes for select brands of devices. It's not as easy as the auto code search, but it can be faster.
- The **Direct Code Entry** lets you enter a code from the accompanying code list for your brand of device. It's not as easy as the other methods, but it's potentially the fastest method.
- The **Manual Code Search** lets you manually go through all the codes for the device you're trying to control.

### Auto Code Search

The Auto Code Search goes automatically through all the codes for the device you're trying to control. When you find the one that operates your device, you can stop the search and store that code.

**TIPS:** Each device key is associated with a type of device—the TV is preset to search for TVs, SAT+CSL-DTC for satellite receivers, cable boxes or digital TV converters, DVD/VCR for DVD players, and DVR-AUX for DVRs. To program a device key for a different type of device, see the Changing a Key's Device Type section.

To exit without saving a new code at any point in the Auto Code Search, press the **EXIT** key.

1. Manually turn on the device you want to control.
2. Press and hold the device key you want to program. The **POWER** key illuminates.

While you're holding down the device key, use your other hand to press and hold the remote's **POWER** key at the same time. The **POWER** key turns off.

3. Wait until the **POWER** key comes on and stays on. Then release both keys.
4. Point the remote directly at the front panel of the device you want to control. Press **PLAY** on the remote and wait 5 seconds. The remote is testing a batch of 50 codes on your device.

**Did your device turn off?**

**YES:** Go to step 5.

**NO:** Press **PLAY** again. The remote 10 codes.

Keep pressing **PLAY** every 5 seconds off.

5. When your device turns off, press the **REVERSE** key on the remote and wait at least 2 seconds. The remote tries the last of the previous ten codes.

#### Did your device turn on?

**YES:** Press the **STOP** key. You're done! You've programmed this device key.

**NO:** Press **REVERSE** again. The remote in the batch.

Keep pressing **REVERSE** every 2 seconds back on. When it does, press 2

**Note:** If you accidentally press the **REVERSE** key when your device turns off, press the **FORWARD** key 5 seconds to see if your device turns off

#### NOTES

Throughout the programming of each the remote pointed at the IR sensor of currently programming the remote to

Test the remote with the device to make device key is programmed with the maximum functionality. If some feature a different code. See the "Testing the Functionality" section below for more

During the Auto Code Search, the remote keypresses that aren't part of the search

The search times out after two minutes blinks four times and turns off, and the code under that device key is retained

The **POWER** key blinks four times and remote has gone through all the codes the Auto Code Search. If your device doesn't try a different search method.

#### Testing the Code for Maximum Fun-

1. Try a variety of the device's functions. If some device features don't work, go a different code.
2. Repeat the Auto Code Search Method. When your device turns off, do not instead, with the unit now off, control key every 5 seconds until the unit turns off.
3. Once the unit turns back on, press the remote every 2 seconds until your device turns off again, press the
4. Test the key's functionality again by a variety of the device's functions. If it been stored controls the majority of programming is complete. If the maximum functionality, try another
