Handbook on the Science of Literacy in Grades 3-8, Core Practices for Teaching Multilingual Students Megan Madigan Peercy, Johanna M. Tigert, Daisy E. Fredricks, 2023 Learn how to teach multilingual students effectively and equitably with this practical and accessible resource. The authors share real-world examples from the classrooms of ESOL teachers, unpack the teachers' thinking about their instruction, and identify six core practices that are foundational to teaching multilingual students: knowing your multilingual students, building a positive learning environment, integrating content and language instruction, supporting language and literacy development, using assessment, and developing positive relationships and engaging in advocacy. The book focuses on how K-12 teachers can use these core practices in ways that humanize their instruction, positioning students as whole human beings, valuing the assets and resources they bring to the classroom, actively involving them in rigorous instruction that draws on their experiences and knowledge, responding to each unique learning context, and disrupting traditional power dynamics in education. This text will help pre- and in-service teachers of multilingual students to center equity and justice in their practice and understand how to move humanizing mindsets into action.
