David, Youdell, Deborah, 1999-12-01 This research should make us extremely sceptical that the constant search for higher standards and for ever increasing achievement scores can do much more than put in place seemingly neutral devices for restratification Michael W Apple John Bascom Professor of Curriculum and Instruction and Educational Policy Studies University of Wisconsin Madison Recent educational reforms have raised standards of achievement but have also resulted in growing inequalities based on race and social class School by school league tables play a central role in the reforms These have created an A to C economy where schools and teachers are judged on the proportion of students attaining five or more grades at levels A to C To satisfy these demands schools are embracing new and ever more selective attempts to identify ability Their assumptions and practices embody a new IQism a simple narrow and regressive ideology of intelligence that labels working class and minority students as likely failures and justifies rationing provision to support those often white middle class boys already marked for success This book reports detailed research in two secondary schools showing the real costs of reform in terms of the pressures on teachers and the rationing of educational opportunity It will be important reading for any teacher researcher or policymaker with an interest in equality in education Neural Implementations of Expertise Merim Bilalić, Robert Langner,Guillermo Campitelli, Luca Turella, Wolfgang Grodd, 2015-12-18 When we think about expertise we usually consider people who master tasks at a level not reachable by most other people Although we rarely realise it however most humans are experts in many aspects of everyday life This expertise enables us to find our way through a complex environment that is our life For instance we can instantly recognise multiple objects and relations between them to form a meaningful unit such as an office Thus research on expertise is not only important to investigate the cognitive and neural processes within an elite group but it is also a powerful tool to understand how everyone can acquire complex skills The goal of this Research Topic is to shed further light on the common and distinct neural mechanisms that implement various kinds of expertise We broadly define expertise as skill in any perceptual cognitive social or motor domain with the common core being optimised information processing due to knowledge acquired from repeated experiences Thus we are interested in the full range of mental processes modulated or modified by expertise from simple object or pattern recognition to complex decision making or problem solving in a particular domain These domains can range from everyday or occupational expertise to sports and rather artificial domains such as board games In all cases the aim should be to elucidate how the brain implements these sometimes incredible feats We are particularly interested in connecting cognitive theories about expertise and expertise related performance differences with models and data on the neural implementation of expertise We welcome original research contributions using the full range of behavioural neuroscience methods as well as theoretical methodological or historical reviews and opinion papers focusing on any of the above mentioned aspects Work in the 21st Century Frank J. Landy, Jeffrey M. Conte, 2019 Now in its sixth edition Work in the 21st Century An Introduction to Industrial and Organizational Psychology by Jeffrey M Conte and Frank J Landy is the most current and engaging text for the

industrial and organizational I O psychology course The text ties together themes and topics such as diversity cognitive and physical abilities personality emotional intelligence technology multicultural dynamics and evidence based I O psychology in a way that explores the rich and intriguing nature of the modern workplace The sixth edition retains the 14 chapter format and the E Text maintains a colorful design that brings I O psychology to life especially with the use of newsworthy color photographs
