McAnally, 2017-10-07 The book begins with a public health epidemiologic examination of the situation with a systematic view of the problem based on classic infectious disease epidemiologic principles applied to this behavioral health issue This application is expanded to take into account the fact that unlike most epidemics in our species history a unique factor that must be accounted for in any public health analysis is that the host opioid dependent misusing patient is generally not under sufficiently strong motivation to avoid the disease The introduction concludes with a survey of recent containment approaches categorized epidemiologically by target agent vector host The remainder of the book is organized according to this framework addressing agent vector transmission and host respectively Sections Three and Four comprise the major focus of the book and are dedicated primarily to practical education for primary care providers in preventing opioid use disorder and overcoming it after the fact **Medical Toxicology of Drug Abuse** Donald G. Barceloux, 2012-02-03 This

book provides a broad reference covering important drugs of abuse including amphetamines opiates and steroids It also covers psychoactive plants such as caffeine peyote and psilocybin It provides chemical structures analytical methods clinical features and treatments of these drugs of abuse serving as a highly useful in depth supplement to a general medical toxicology book The style allows for the easy application of the contents to searchable databases and other electronic products making this an essential resource for practitioners in medical toxicology industrial hygiene occupational medicine pharmaceuticals environmental organizations pathology and related fields Drugs Great Britain: Parliament: House of Commons: Home Affairs Committee, 2012-12-10 Whilst it supported a number of steps the Government has taken in its 2010 drug strategy it believes more needs to be done to comprehensively address the drugs problem in the UK The report focuses on the need to break the cycle of drug addiction and highlights in particular the need for improved treatment in prisons and wider society and for early intervention with better education and preventative work Three key areas were covered prisons treatment and the calling for the establishment of a Royal Commission into the issues The Committee was disturbed to find

that almost a quarter of prisoners found it easy to get drugs in prison and recommended that measures such as regular random drug tests based on suspicion be increased It was concerned that the Government s policy of recovery was not being implemented in particular that drug rehabilitation in prison was undermined by the lack of support for offenders on release and did not take into account prescription drug addiction The Committee is also concerned that the goal of retaining addicts in treatment has precluded attempts at recovery It supported the Government s objective of recovery but noted that this will require a range of treatment options with each individual needing a tailored treatment plan The Committee highlighted residential rehabilitation and the use of buprenorphine as an alternative to methadone as two treatment methods which were currently under utilised Treatment must also be supplemented by housing training and employment support if required

The Picture of Addiction Margaret J Loewen,2024-08-01 A physician mother shares her true story of learning about opioids in a rural community as she begins medical practice This class of medications highly desired for treatment of pain but resulting in addiction for many due to liberal prescribing fuels an opioid epidemic Following a reduction in legal opioid availability in her town heroin arrives to fill the gap The market for this illegal drug had already been created leading to many more developing opioid use disorder Her own son makes a single bad decision and is exposed to heroin As a result of her experiences doing everything a mother can to keep her son alive she is shocked by the stigma and lack of effective and affordable care for people with this disease She discovers that the treatment with the best track record in helping people achieve recovery is a medication called buprenorphine When emergency departments provide the first dose when a person with opioid use disorder is in withdrawal then refer to out patient clinics plus community programs to provide jobs and housing people with this disease can recover She initiated inductions with buprenorphine in her ER and demonstrates how easily this can be done in every hospital
