Larry V. Hedges, Barbara Schneider, 2005-05-26 Schools are complex social settings where students, teachers, administrators and parents interact to shape a child's educational experience. Any effort to improve educational outcomes for America's children requires a dynamic understanding of the environments in which children learn. In *The Social Organization of Schooling*, editors Larry Hedges and Barbara Schneider assemble researchers from the fields of education, organizational theory and sociology to provide a new framework for understanding and analyzing America's schools and the many challenges they face. *The Social Organization of Schooling* closely examines the varied components that make up a school's social environment. Contributors Adam Gamoran, Ramona Gunter and Tona Williams focus on the social organization of teaching. Using intensive case studies, they show how positive professional relations among teachers contribute to greater collaboration, the dissemination of effective teaching practices and ultimately a better learning environment for children. Children learn more from better teachers, but those best equipped to teach often opt for professions with higher social stature such as law or medicine. In his chapter, Robert Dreeben calls for the establishment of universal principles and practices to define good teaching, arguing that such standards are necessary to legitimize teaching as a high status profession. *The Social Organization of Schooling* also looks at how social norms in schools are shaped and reinforced by interactions among teachers and students. Sociologist Maureen Hallinan shows that students who are challenged intellectually and accepted socially are more likely to embrace school norms and accept responsibility for their own actions. Using classroom observations, surveys and school records, Daniel McFarland finds that group-based classroom activities are effective tools in promoting both social and scholastic development in adolescents. *The Social Organization of Schooling* also addresses educational reforms and the way they affect a school's social structures. Examining how testing policies affect children's opportunities to learn, Chandra Muller and Kathryn Schiller find that policies which increased school accountability boosted student enrollment in math courses, reflecting a shift in the school culture towards higher standards. Employing a variety of analytical methods, *The Social Organization of Schooling* provides a sound understanding of the social mechanisms at work in our educational system. This important volume brings a fresh perspective to the many ongoing debates in education policy and is essential reading for anyone concerned with the future of America's children. *Empowering Teachers for Equitable and Sustainable Education* Maria Teresa Tatto, 2024-04-16 This groundbreaking book uses a comprehensive study of a novel Master of Education program to showcase how teachers can be engaged in authoritative, equity-based research using comparative education theory, inquiry-based pedagogy and the UNESCO SDGs as powerful frameworks. By developing agency to advance culturally sustaining and humanizing practices, it demonstrates how teachers can promote equity in their classrooms and communities. The central premise of the program is that teachers must become comparative, global and local action researchers to have agency in their practice and to become effective advocates for the cultural and learning needs of their students, especially those in disadvantaged contexts or learning at the bottom of the

pyramid By learning comparative framing and social science methods reviewing the literature to select verifiable educational research and developing and implementing a plan for action research this book offers new ideas for how teachers can effectively respond to recent UNESCO calls to reimagine and create promising futures locally By providing formative and summative evidence of culturally and socially transformative learning and showcasing how teacher educators can engage teachers in authoritative justice inquiry based research this book will appeal to scholars faculty and researchers of comparative education and teacher education and development
