Equitable Education Sameena Choudry,2025-02-28 Never has a book on social justice and equitable education been so relevant Recent events have highlighted the huge attainment gaps that exist for many pupils within the education system due to factors outside of their control As the diversity of the pupil population increases it is more important than ever to develop the skills knowledge and understanding within the teaching profession around issues of equality and inclusion This book provides trainees and teachers with an in depth understanding of the complex issues related to the attainment of key groups of disadvantaged pupils and practical strategies that can be deployed to address these gaps Chapters focus on social class gender English as an additional language minority ethnic achievement gypsy Roma and travellers refugee and asylum seekers and those with special educational needs and disabilities The book takes a stark look at the evidence and statistics provides an overview of the key issues and considerations for each particular group and suggests key resources and examples of good practice along with case studies and points for reflection Ultimately it encourages you to have high expectations of your pupils and to truly believe that you can help them realise their ambitions and aspirations This is a powerful and timely consideration of the ways in which education has the capacity to make a difference Packed full of evidence informed strategies this book considers the range of ways that schools can respond positively to build far greater equity for all Sameena Choudry s contribution is authoritative and compelling and deserves our full attention Dame Alison Peacock

Vessel Health and Preservation: The Right Approach for Vascular Access Nancy L. Moureau,2019-06-10 This Open access book offers updated and revised information on vessel health and preservation VHP a model concept first published in poster form in 2008 and in JVA in 2012 which has received a great deal of attention especially in the US UK and Australia The book presents a model and a new way of thinking applied to vascular access and administration of intravenous treatment and shows how establishing and maintaining a route of access to the bloodstream is essential for patients in acute care today Until now little thought has been given to an intentional process to guide selection insertion and management of vascular access devices VADs and by default actions are based on crisis management when a quickly selected VAD fails The book details how VHP establishes a framework or pathway model for each step of the patient experience intentionally guiding improving and eliminating risk when possible The evidence points to the fact that reducing fragmentation establishing a pathway and teaching the process to all stakeholders reduces complications with intravenous therapy improves efficiency and diminishes cost As such this book appeals to bedside nurses physicians and other health professionals **Structural**

Variation of the Chloroplast Genome and Related Bioinformatics Tools Tapan Kumar Mohanta,Baozhong Duan,Weijun

Kong,Gang Zhang,Linchun Shi,2024-04-18 The plastid genome has been the most important source of data for the reconstruction of plant phylogeny and taxonomic studies With the rapid advancement of sequencing technology and bioinformatics it has become laboratory routine work for obtaining plastid genomes plastome and population studies can be performed using chloroplast genome data However plastid genomes with specific characters such as pseudogenes gene losses gene duplications gene rearrangements widespread intra individual polymorphisms large scale horizontal gene transfer etc have not been systematically studied For example plastomes of several saprophytic plants were confirmed to have lost many photosynthesis genes The IR region of some plants decreased to several hundred base pairs disappears completely increased by dozens of kb or repeat in the same direction Most of these chloroplast structural variations are related to import plant evolution or special environmental adaptation but their mechanisms are still unclear and effective analytical tools are lacking
