

## TAMD41

6-cylinder, 4-stroke, direct-injected turbocharged marine diesel engine with aftershaft and reverse gear. Up to 147 kW (200 hp)†

**Multi-fuel marine engine**

Standard is a multi-fuel engine meeting engine with conventional diesel operation – however for meeting ISO15000 the required alternative is a conversion for gas operation.

**Direct injection**

Direct injection (DI) results in a fuel that has been atomized and distributed over a small area of the combustion chamber, resulting in a more efficient engine (DIE) with low smoke emission levels.

**Turbocharging**

The engine is turbocharged with an exhaust driven turbocharger. When the gas flow from the cylinder is then sent to the turbine that drives the compressor against and the engine runs with clean, dense combustion air. The exhaust gases are drawn off the turbocharger and drawn off the engine.

The turbocharger also draws off the exhaust gases from the exhaust manifold.

**Aftershaft**

The aftershaft is a separate shaft for the aftershaft. In the aftershaft, a large oil pump system. The aftershaft is the aftershaft and is used as a separate oil pump system to keep the engine running at the lowest possible level.

**Low exhaust emission levels**

The low exhaust emission levels and aftershaft emissions are achieved by low emissions and aftershaft emissions.

**Reverse gear**

The aftershaft is a separate shaft for the aftershaft. In the aftershaft, a large oil pump system. The aftershaft is the aftershaft and is used as a separate oil pump system to keep the engine running at the lowest possible level.

The aftershaft is a separate shaft for the aftershaft. In the aftershaft, a large oil pump system. The aftershaft is the aftershaft and is used as a separate oil pump system to keep the engine running at the lowest possible level.
