**Unconventional Flying Objects** Paul R. Hill,1995 Explains the physics science and technology of UFOs

**Unconventional Flying Objects** Hill, Paul R.,2014-06-01 Paul Hill was a well respected NASA scientist when in the early 1950s he had a UFO sighting Soon after he built the first flying platform and was able to duplicate the UFO s tilt to control maneuvers Official policy however prevented him from proclaiming his findings I was destined says Hill to be as unidentified as the flying objects For the next twenty five years Hill acted as an unofficial clearinghouse at NASA collecting and analyzing sightings reports for physical properties propulsion possibilities dynamics etc To refute claims that UFOs defy the laws of physics he had to make technological sense of the unconventional object After his retirement from NASA Hill finally completed his remarkable analysis This book published posthumously presents his findings that UFOs obey not defy the laws of physics Vindicating his own sighting and thousands of others he proves that UFO technology is not only explainable but attainable

**The UFO Phenomenon** Robert Davis,2015-02-28 A comprehensive perspective of evidence and future directions associated with the UFO phenomenon Includes review and analysis of studies evidence theories and research needs involving UFO topics Extensive scientific endnotes

**UFOs** Karl Svozil,2023-08-01 Unidentified phenomena in space in the Earth s atmosphere and in waters are too important to leave their exploration to the military and scientific laypersons Their proper scientific study is important for a variety of reasons in particular scientists and the public at large need to know the basic facts to be informed about the way evidence is recorded and to understand the difference between reliable evidence and fiction as well as between plausible explanations and fantasy With this objective the book surveys the history of UFO observations the variety of recorded phenomena and recounts the efforts of investigative commissions and their published findings Although wild rumors are demystified in the process this is not an exercise in rumor bashing An open and at the same time critical mindset is the key Many narratives and hypothesis appear implausible relative to our present state of knowledge but this alone should not lead to their outright exclusion Thus the author also pays attention to UFO sightings that have so far eluded explanation in terms of known physics or meteorology Here the reader will encounter some of the more speculative but scientifically tenable proposals for example relating to sudden zigzag motion without apparent inertia or recognizable propulsion yet always with a clear guide to their plausibility Last but not least the book outlines plans and suggestions for future research capable of revealing the existence and intentions of extraterrestrial intelligences outer space engineers or technologies so far known only from science fiction

*Dream Seeker* Harold A. Skaarup,2002-07-29 The Dream Seeker is a collection of stories dreams and readings which touch on the Light that shines within us Those who have a strong faith and a loving heart radiate this Light and one result is others are drawn to it When you have this light there should be no questions or answers that you should fear Many of the answers to the questions in this book may surprise you Have we been here before Is it possible we have had past lives Are there others visiting us Can our future be understood Can we be shown the way ahead You will find responses to these questions based upon interviews with gifted people who believe that many things are possible We are all given incredible gifts that seem to have been significantly enhanced with recent changes that have taken place around us One must always honour such gifts or they will just as quickly be taken away It is my hope that you will find something that resonates within you in this book and that you too will choose to walk in the Light

**Visitors** Harold A. Skaarup,2000-09-04 Suppose you could communicate with a visitor who was not from this place time space or even this dimension What would you want to ask them The answers probably lie in what our own response would be if we were them This book is based on a collection of interviews I have had with a few individuals who may have actually had such an experience The idea is that if enough of us are ready to ask the questions and gain the answers then our collective knowledge and understanding of the multiverse about us can only continue to be enhanced Sometimes the responses that you will read here are similar often they are diametrically opposed to each other An open but highly skeptical mind is extremely necessary if you are going to sift through the data that is presented in this book The intent is that it should peak your curiosity to learn more about visitors In this way we may be better informed and prepared and thus in some sort of coherent shape to deal with their arrival If you read this book you must be well prepared to choose for yourself what you will or will not believe
