Wikipedia John Broughton, 2008 Provides information on editing creating and maintaining Wikipedia articles collaborating with other editors formatting and illustrating articles and building a stronger encyclopedia **Wikipedia U** Thomas Leitch, 2014-11-01 Explores the battle between the top down authority traditionally ascribed to experts and scholars and the bottom up authority exemplified by Wikipedia Since its launch in 2001 Wikipedia has been a lightning rod for debates about knowledge and traditional authority It has come under particular scrutiny from publishers of print encyclopedias and

college professors who are skeptical about whether a crowd sourced encyclopedia in which most entries are subject to potentially endless reviewing and editing by anonymous collaborators whose credentials cannot be established can ever truly be accurate or authoritative In Wikipedia U Thomas Leitch argues that the assumptions these critics make about accuracy and authority are themselves open to debate After all academics are expected both to consult the latest research and to return to the earliest sources in their field each of which has its own authority And when teachers encourage students to master information so that they can question it independently their ultimate goal is to create a new generation of thinkers and makers whose authority will ultimately supplant their own Wikipedia U offers vital new lessons about the nature of authority and the opportunities and challenges of Web 2 0 Leitch regards Wikipedia as an ideal instrument for probing the central assumptions behind liberal education making it more than merely as one of its severest critics has charged the encyclopedia game played online [Wikipedia](#) ,2004 Opbygget efter princippet om Open Source Alle kan skrive nye opslagsord og forklaringer ind i leksikonnet der s ledes hele tiden er under udvikling Findes p mange sprog bl a *English for Medical Communication* Clarence Wenfeng Wang,2025-02-28 English for Medical Communication A Guide to Course Design is a practical guide to the design of health communication courses in English for Academic Specific Purposes EAP ESP Written by an experienced team of EAP ESP practitioners teaching communication courses to medical students the chapters cover ten key areas in medical communication such as reporting patient history writing a medico legal report discussing ethical cases writing a Wikipedia article in medicine and presenting community project findings in a research report The book covers medical communication among healthcare professionals with laypersons and researchers Each chapter introduces course design principles teaching approaches and techniques course materials with effective classroom tasks and students sample assignments Each chapter also provides resources to support teachers in designing courses in a wider international context Including up to date literature on key concepts and core understandings and best practices in medical communication this accessible volume is an essential guide for language teachers of EAP ESP programs designing courses for medical students at both undergraduate and postgraduate levels worldwide [Wikipedia](#) Mr Dan O'Sullivan,2012-10-01 During its brief existence Wikipedia has proved astonishingly successful with 2 8 million articles in English alone available freely to all with access to the internet The online encyclopedia can be seen as the 21st century s version of earlier historical attempts to gather the world s knowledge into one place this unique book offers a description of some of these earlier attempts O Sullivan follows with a thorough analysis of Wikipedia itself suggesting how to approach and contribute to the site and what can be gained from using it Writing in an accessible style the author takes a socio historical approach and argues that by looking at communities of practice in the past we can come to understand the radical even political nature of Wikipedia The book will have a broad appeal to anyone interested in the development of this unique project including information management professionals but also historians sociologists educators and students

Wikipedia, 3.5 million Articles & Counting Heather Hasan, 2011-12-15 Wikipedia the massive ever expanding and entirely free online encyclopedia largely written edited and managed by volunteers has transformed the way people seek information especially students It has also been scorned of many teachers and librarians administrators due to its entries frequent errors and biases This book seeks to take an even handed and realistic approach to Wikipedia acknowledging its serious flaws and shortcomings as a research tool while also explaining what is valuable about it and how it can be used carefully to gain a grounding of a subject that will then be researched in greater depth and with more reputable sources The book addresses how users can lodge complaints about a Wikipedia entry how entries are corrected and how one goes about writing an entry Finally the latest thinking of teachers librarians and school administrators regarding Wikipedia will be discussed as will their suggestions for how best to use the online encyclopedia as a legitimate research tool Writing History in the Digital Age Jack Dougherty, Kristen Nawrotzki, 2013-10-28 A born digital project that asks how recent technologies have changed the ways that historians think teach author and publish Jimmy Wales and Wikipedia Susan Meyer, 2012-07-15 Born in Huntsville Alabama no one expected that Jimmy Wales would go on to create one of the most successful and widely used Web sites in history Wikipedia Wikipedia is the product of a lot of hard work It had its ups and downs and its failures and successes before becoming the Internet phenomenon it is today This book details the journey from the early life of Jimmy Wales through the height of Wikipedia's success Good Faith Collaboration Joseph M. Reagle, Jr., 2012-09-21 How Wikipedia collaboration addresses the challenges of openness consensus and leadership in a historical pursuit for a universal encyclopedia Wikipedia the online encyclopedia is built by a community a community of Wikipedians who are expected to assume good faith when interacting with one another In *Good Faith Collaboration* Joseph Reagle examines this unique collaborative culture Wikipedia says Reagle is not the first effort to create a freely shared universal encyclopedia its early twentieth century ancestors include Paul Otlet's Universal Repository and H G Wells's proposal for a World Brain Both these projects like Wikipedia were fuelled by new technology which at the time included index cards and microfilm What distinguishes Wikipedia from these and other more recent ventures is Wikipedia's good faith collaborative culture as seen not only in the writing and editing of articles but also in their discussion pages and edit histories Keeping an open perspective on both knowledge claims and other contributors Reagle argues creates an extraordinary collaborative potential Wikipedia's style of collaborative production has been imitated analyzed and satirized Despite the social unease over its implications for individual autonomy institutional authority and the character and quality of cultural products Wikipedia's good faith collaborative culture has brought us closer than ever to a realization of the century old pursuit of a universal encyclopedia
