Brown,Stewart Jay Brown,2008-04-24 This is an exploration of William Robertson a leading figure in the eighteenth century Enlightenment **The Enlightenment and the Book** Richard B. Sher,2008-09-15 The late eighteenth century witnessed an explosion of intellectual activity in Scotland by such luminaries as David Hume Adam Smith Hugh Blair William Robertson Adam Ferguson James Boswell and Robert Burns And the books written by these seminal thinkers made a significant mark during their time in almost every field of polite literature and higher learning throughout Britain Europe and the Americas In this magisterial history Richard B Sher breaks new ground for our understanding of the Enlightenment and the forgotten role of publishing during that period The Enlightenment and the Book seeks to remedy the common misperception that such classics as *The Wealth of Nations* and *The Life of Samuel Johnson* were written by authors who eyed their publishers as minor functionaries in their profession To the contrary Sher shows how the process of bookmaking during the late eighteenth century involved a deeply complex partnership between authors and their publishers one in which writers saw the book industry not only as pivotal in the dissemination of their ideas but also as crucial to their dreams of fame and monetary gain Similarly Sher demonstrates that publishers were involved in the project of bookmaking in order to advance human knowledge as well as to accumulate profits The Enlightenment and the Book explores this tension between creativity and commerce that still exists in scholarly publishing today Lavishly illustrated and elegantly conceived it will be must reading for anyone interested in the history of the book or the production and diffusion of Enlightenment thought *The Works of William Robertson* William Robertson,Stewart Dugald,1844 Edinburgh History of the Book in Scotland, Volume 2 Stephen W Brown,2011-11-30 The first thorough study of the book trade during the age of Fergusson and Burns **Edinburgh History of the Book in Scotland, Volume 2: Enlightenment and Expansion 1707-1800** Stephen W. Scots in Edinburgh Glasgow London Dublin and Philadelphia amassed fortunes while bringing to international markets classics in medicine and economics by Scottish authors as well as such enduring works of reference as the Encyclopaedia Britannica Entrepreneurship and a vigorous sense of nationalism brought Scotland from financial destitution at the time of the 1707 Union to extraordinary wealth by the 1790s Publishing was one of the country's elite new industries

Smitten, 2016-10-26 The first modern biography of William Robertson a key figure of the Scottish Enlightenment A prominent figure in the Scottish Enlightenment William Robertson differed from his contemporaries such as Voltaire Hume and Gibbon because he used the critical tools of the Enlightenment to strengthen religion not to attack it As an historian he helped shape 18th century historiography As a minister of the Church of Scotland he sought to make the church fit for a polite age And as principal of the University of Edinburgh he presided over a flourishing of intellectual inquiry in the midst of the Enlightenment But despite his European fame he was a controversial figure Drawing extensively on his unpublished correspondence Jeffrey Smitten captures both the man and his work in his own words By foregrounding Robertsons religious outlook Smitten gives us a more contextualised and nuanced interpretation of Robertson's motives intentions and beliefs than we have had before

Key Features Includes new biographical information drawn from archival sources and from all Robertson's largely unpublished correspondence Discusses Robertson's works published and unpublished Assesses Robertson's achievement based on fresh consideration of all facets of his career as minister historian and principal

Early Modern Publishers Barnaby Cullen, Ian

Maclean, Arthur der Weduwen, 2025-07-16 Publishers play an indisputably important part in book history but cover such wide areas of activity that they are rarely given a formal definition This volume seeks to place the publisher at the heart of the early modern book trade It examines their identities and careers the business strategies they adopted for survival their involvement in the professional religious political and economic conditions in which they found themselves and the constraints under which they had to operate By presenting more than twenty case studies on individual and groups of publishers active in Sweden Prussia Switzerland France Italy England Ireland Germany and the Low Countries this volume makes a major contribution to the study of an elusive but essential figure in the history of the early modern book

The Business of Enlightenment Robert DARNTON, Robert Darnton, 2009-06-30 A major achievement of American scholarship and in the first rank of those which have been transforming our view of French history during the last twenty years New York Review of Books A great book about an even greater book is a rare event in publishing Robert Darnton's history of the Encyclopédie is such an occasion The author explores some fascinating territory in the French genre of *histoire du livre* and at the same time he tracks the diffusion of Enlightenment ideas He is concerned with the form of the thought of the great philosophes as it materialized into books and with the way books were made and distributed in the business of publishing This is cultural history on a broad scale a history of the process of civilization In tracing the publishing story of Diderot's Encyclopédie Darnton uses new sources the papers of eighteenth century publishers that allow him to respond firmly to a set of problems long vexing historians He shows how the material basis of literature and the technology of its production affected the substance and diffusion of ideas He fully explores the workings of the literary market place including the roles of publishers book dealers traveling salesmen and other intermediaries in cultural communication How publishing functioned as a business and how it fit into the political as well as the economic systems of prerevolutionary Europe are set forth The making of books touched on this vast range of activities because books were products of artisanal labor objects of economic exchange vehicles of ideas and elements in political and religious conflict The ways ideas traveled in early modern Europe the level of penetration of Enlightenment ideas in the society of the Old Regime and the connections between the Enlightenment and the French Revolution are brilliantly treated by Darnton In doing so he unearths a double paradox It was the upper orders in society rather than the industrial bourgeoisie or the lower classes that first shook off archaic beliefs and took up Enlightenment ideas And the state which initially had suppressed those ideas ultimately came to favor them Yet at this high point in the diffusion and legitimation of the Enlightenment the French Revolution erupted destroying the social and political order in which the Enlightenment had flourished Never again will the contours of the Enlightenment be drawn without reference to this work Darnton has written an indispensable book for historians of modern Europe
