The Vietnam War effected the whole world in many ways. But when talking about wars in class only give you one perspective which is the big picture. But what about the small picture? The effect the war had on individuals and their families. Sometimes hearing the story from someone who was in the war can give you a better understanding about the conditions they faced. For this oral history paper interviewed my uncle Steven Mangled who was an engineer sergeant in the Vietnam War.

During this time before the draft was abolished in 1973, many troops were selected for service through the drafts but those who didn't want to go to war would sometimes flee to Canada or other places. 25 percent of the troops that served in this war were draftees. These people were called "draft dodgers." My uncle didn't want to be one of these people and wanted to do his duty as an American citizen so he joined the army in the 1960's after graduating college. He went through NCO school, which is a course to becoming a non-commissioned officer.

He then went through his training to become a sergeant and entered the U. S Army Corps of Engineers. Shortly after, around 1970, he was sent to Vietnam. His mission there was to support an artillery unit that was stationed on the border of North and South Vietnam. He built and designed things like helicopter pads, flood protection systems, facilities for the army and many other things. During his stay he also had the opportunity to help build a hospital for the Vietnamese people.

One of the things that affected my uncle during the war was the subject of races. At this time period there was a lot of civil rights movements going on. The Vietnam War had a very high percentage of blacks more than any war before it. Blacks made up about 13 percent of the troops that served. Before joining the war my uncle had a lot of prejudices about the different races, but started to think differently after working closely with people from all different races and ethnicities. He learned to live with them and became very close to a lot of them.

The Vietnam War provided these African Americans and Hispanics their first experiences of white comradeship and really opened peoples eyes to the fact that they weren't all that different. Of course there was bound to be occasional racial tension but they tried to keep this tension from affecting the performance of the troops. My uncle started to gain respect for Hispanics in the war. He said that they were the hardest workers and had a great work ethic. His visions of the races totally changed.

Another thing that really affected my uncle was when he was building the hospital for the Vietnamese. The hospitals in the Vietnam War were different from any other war. There wasn't a very good road system through Vietnam so transportation was very hard so most of the hospitals were sem

UGC NET Library Science (Paper-II) Study Notes (Vol.-1) , **Oral History** , 2003 Testimonies of the City Dr Joanna Herbert, Professor Richard Rodger, 2013-06-28 Oral testimony is one of the most valuable but challenging sources for the study of modern history providing access to knowledge and experience unavailable to historians of earlier periods In this groundbreaking collection oral testimonies are used to explore themes relating to the construction of urban memories in European cities during the twentieth century From the daily experiences of city life to personal and communal responses to urban change and regeneration to migration and the construction of ethnic identities oral history is employed to enrich our understanding of urban history It offers insights and perspectives that both enhance existing approaches and forces us to re

examine official histories based on more traditional sources of documentation Moreover it enables the historian to understand something of the nature of memory itself and how people construct their own versions of the urban experience to try to make sense of the past By using the full range of opportunities offered by oral history as well as fully considering the related methodological issues of interpretation this volume provides a fascinating insight into one of the least explored areas of urban history As well as adding to our understanding of the European urban experience it highlights the potential of this intersection of oral and urban history

Where Is History Today? Laura Mulvey, Frank Ankersmit, Daniel Pick, Tomáš Jirsa, Martin Elbel, Jiří Lach, 2015-02-05 History no longer belongs only to historians but is woven into the fabric and discourse of daily life This fresh and wide ranging survey explores how new media and new historiographic approaches are dramatically expanding what we understand by history today Controversy about the aims and limits of historical analysis has raged ever since the rise of postmodern history in the 1970s But these debates have rarely affected the understanding of history in Central and Eastern Europe The volume confirms the crucial importance of audiovisual and mass media from film to television and radio to comics but does not exclude literary scholars and art historians who are also rethinking their methods taking note of their new consumers If history formerly appeared to be a one way transmission of expertise it is increasingly a dynamic engagement between researchers and audiences

History and GIS Alexander Lünen, Charles Travis, 2012-12-05 Geographical Information Systems GIS either as standard GIS or custom made Historical GIS HGIS have become quite popular in some historical sub disciplines such as Economic and Social History or Historical Geography Mainstream history however seems to be rather unaffected by this trend More generally speaking Why is it that computer applications in general have failed to make much headway in history departments despite the first steps being undertaken a good forty years ago With the spatial turn in full swing in the humanities and many historians dealing with spatial and geographical questions one would think GIS would be welcomed with open arms Yet there seems to be no general anticipation by historians of employing GIS as a research tool As mentioned HGIS are popular chiefly among Historical

Geographers and Social and Economic Historians The latter disciplines seem to be predestined to use such software through the widespread quantitative methodology these disciplines have employed traditionally Other historical sub disciplines such as Ancient History are also very open to this emerging technology since the scarcity of written sources in this field can be mitigated by inferences made from an HGIS that has archaeological data stored in it for example In most of Modern History however the use of GIS is rarely seen The intellectual benefit that a GIS may bring about seems not be apparent to scholars from this sub discipline and others This book wants to investigate and discuss this controversy Why does the wider historian community not embrace GIS more readily While one cannot deny that the methodologies linked with a GIS follow geographical paradigms rather than historical ones the potential of GIS as a killer application for digital historical scholarship should be obvious This book brings together authors from Geography and History to discuss the value of GIS for historical research The focus however will not be on the how but on the why of GIS in history

Choose a company based on previous customer satisfaction and whether the company gives you choices of how many markers you want various ethnic and geographic databases and surname projects based on DNA driven genealogy. Before you select a company to test your DNA find out how many genetic markers will be tested. For the maternal line 400 base pairs of sequences are the minimum. For the paternal line men only 37 markers are great but 25 markers also should be useful. Some companies offer a 12 marker test for surname genealogy groups at a special price.
