Orbital Tome Justice:

The Advancement of Learning Francis Bacon, 2016-10-17 *The Advancement of Learning* is a splendid attempt to defend and magnify the pursuit of learning and then to survey the existing state of human knowledge Part of the argument of the first part has lost its cogency or even its relevancy today But in breadth of view and fertility of suggestion the work is extraordinary As a statement of intellectual ideals and a program or even a prophecy of their accomplishment it stands among the most significant productions of the Renaissance This is the annotated edition including more than 600 notes
