*Discourse on Sacred and Profane Images* Gabriele Paleotti,2012 In the

wake of the Counter Reformation Cardinal Gabriele Paleotti the archbishop of Bologna wrote a remarkable treatise on art during a time when the Church feared rampant abuse in the arts Translated into English here for the first time Paleotti s Discourse on Sacred and Profane Images argues that art should address a broad audience and explains the painter s responsibility to his spectators The Discourse is introduced by historian Paolo Prodi who explains how even if the archbishop did not succeed in reforming the arts Paleotti s treatise constituted one last synthesis of art as a reading of creation and salvation history and sacred art as a vehicle of devotion

*Art Theory as Visual Epistemology* Harald Klinke,2014-06-26

How can we know What does knowledge mean These were the fundamental questions of epistemology in the 17th century In response to continental rationalism the British empiricist John Locke proposed that the only knowledge humans can have is

acquired a posterior In a discussion of the human mind he argued the source of knowledge is sensual experience mostly vision Since vision and picture making are the realm of art art theory picked up on questions such as are pictures able to represent knowledge about the world How does the production of images itself generate knowledge How does pictorial logic differ from linguistic logic How can artists contribute to a collective search for truth Questions concerning the epistemic potential of art can be found throughout the centuries up until the present day However these are not questions of art alone but of the representational value of images in general Thus the history of art theory can contribute much to recent discussions in Visual Studies and Bildwissenschaften by showing the historic dimension of arguments about what images are or should be What is knowledge is as much a philosophic question as What is an image Visual epistemology is a new and promising research field that is best investigated using an interdisciplinary approach that addresses a range of interconnected areas such as internal and external images and the interplay of producer and perceiver of images This publication outlines this territory by gathering together several approaches to visual epistemology by many distinguished authors

*The Long Picturesque, or Unraveling the Rules of Art* Patricia Emison,2024-10-16 This book provides a Renaissance art historian's view of how the picturesque aesthetic developed from roots in the sixteenth century mostly in painting but with ramifications for printmaking landscape design and architecture and further how the picturesque aesthetic fundamentally changed the relationship between art and nature between viewer and image The book's argument is based on wide reading of obscure yet piquant critical texts mostly of the seventeenth and eighteenth centuries together with consideration of varied works of art ranging from Fra Angelico to Raphael and Michelangelo and from Rubens to Canaletto and from James Gibbs to Jacques Demy all of them studied not for their place in the history of style but for their spatial imagination
