

What is an Empire?

Imagine the United States, Canada, Mexico, and several other countries coming together but are ruled by a single person or one group of people. There would no longer be different presidents or courts and everything would be decided by a very powerful single person or government. This would be an example of a modern-day empire. Of course, there are no longer empires in the world today, but throughout history there have been several.

An **empire** is a group of nations and/or people ruled over by an **emperor** (male leader), **empress** (female leader), or another powerful government. They are looked upon as the supreme authority. Currently in the world, some people may argue as to whether there are still empires, but there are no longer empires like those from ancient history. One empire which once was considered a powerful and important civilization, which included Ancient Rome and most of Europe, was the Roman Empire.

The Roman Empire

Over 2,000 years ago the city of Rome was the largest in the world and was the head of the **Roman Empire**, which included territories throughout Europe, Africa, and Asia. The Roman Empire lasted approximately 1,500 years between 27 BC and 1453 AD. The culture of Ancient Rome spread throughout Europe during those years. It is credited with influencing much of the current culture in areas such as government, engineering, architecture, language, and literature.

The first emperor of the Roman Empire was **Caesar Augustus**, followed through the years by several more emperors including Nero (who is remembered for his indifference while Rome burnt to the ground), Vespasian (known for building the Colosseum), Constantine I, Theodosius I, Basil II, and many others. Augustus became the first official leader following the assassination of **Julius Caesar**, and he cleverly built a strong military, institutions, and legislation to become the single ruler. In addition, Augustus laid the foundation for 200 straight years of peace.

The Roman leaders had extensive power over the empire. They oversaw the working of the senate, set forth rules and regulations for the senate, had religious authority to conduct ceremonies, control the Roman calendar, and could punish or pardon any citizen, veto senate decisions, and much more.

Through the years, the empire grew and it became more difficult to manage from the city of Rome. The leaders decided to split Rome into two empires, the Western, ruled from the city of Rome, and the Eastern, ruled from Constantinople (part of today's Turkey). The Eastern Roman Empire later became known as the **Byzantine Empire**.
